

Lighttools® Soft Egg Crates® for Briese

Attach Lighttools® Diffuser

The Lighttools diffuser to fit Briese is designed with bungee cord loops to slip over the pole ends allowing air flow for ventilation.

Attach Soft Egg Crates®

Locate the sleeves sewn into the frame of the Soft Egg Crate and align with the Briese pole ends. Slide the Soft Egg Crate sleeves over the pole ends to install in front of the diffuser.

Remove Soft Egg Crate®

Gently pull the Soft Egg Crate away from the pole ends. Compress the Soft Egg Crate into a tight circular shape and store in the zippered carrying bag.

For best results Lighttools recommends using a diffuser between the Soft Egg Crate and the light source.

Hard light without a diffuser can result in shadows cast by the Soft Egg Crate
