

Original Lighttools® Stretch Frames® and Soft Egg Crates® To fit Elinchrom Rotalux Octa Softboxes

With the softbox face down on the floor, fit the Lighttools® Stretch Frame® over the softbox from the rear and work it towards the front.

Wrap the frame around the front perimeter of the softbox so that the elastic band at each corner of the frame is flush with the front of the diffusion panel of the softbox.

With the Stretch Frame® installed on the softbox, you are ready to install the Lighttools® Soft Egg Crate® to the Stretch Frame® at the top of the softbox.

Attach the bottom side of the Soft Egg Crate® to the corresponding bottom side of the frame.

With the top and bottom sides of the grid attached, attach the right and left sides of the grid to the frame to complete the installation.

On select models tabs are available inside the skirt for securing the Stretch Frame® for the Elinchrom box.

Assembly for Lighttools® Stretch Frames® and Soft Egg Crates® To fit Elinchrom Square and Rectangular Softboxes

The assembly procedure for the Elinchrome Rotalux square and rectangular softboxes is similar to the procedure for the Elinchrom Rotalux Octa softboxes described above.

1. Install frame on softbox
2. Install Soft Egg Crate® into frame
3. Ready to use!
