

## Care Instructions for Cleaning Waxed Surfaces

### Polish Recommendations

*For Stripped Pine Finish:*

We recommend Fiddes and Sons Supreme Wax Polish for our Stripped Pine finish.

*For Natural, Tudor Brown, or Ebony Finish:*

We recommend BRIWAX to protect the original quality of the wood, restore it and then recondition it as it needs it.

BRIWAX and Fiddes Wax can be bought on Amazon or directly at [briwax.com](http://briwax.com) or [Fiddes-USA.com](http://Fiddes-USA.com) to maintain and polish your mantel through the years.

### Instructions:

Rub polish onto the wood with a lint free t-shirt or rag and polish. The faster you polish, the shinier it will get.

We suggest not using any harsh cleaners on your wood mantel. Feather dusting works best as some cloths might catch on the cuts that are in the wood. You may use a damp rag when something spills on your mantel, but be careful when wiping so as not to snag your rag or the wood.

### Attention:

*Every piece of wood is hand picked and will have its own unique personality. It may have nail holes, bolt holes, seasoning checks (cracks), insect burroughs, dents, joinery pockets, notches, fastener marks, grain and color variations. No two mantels will be identical. All of these "imperfections" add to the beauty of these reclaimed barn wood mantels.*
