

## Ceramic Stain Colors for Alterna Sets

Rasmussen formulates our own proprietary, environmentally-friendly ceramic stain colorations, which differ from paint in the following qualities:

- 1) Ceramic Stain produces a transparent, non-uniform appearance as it absorbs into the material's pores, rather than merely covering the surface of the shape, like paint does.
- 2) Unlike paint, Ceramic Stain will not burn away under fire. Ceramic Stain will age gracefully.
- 3) Color appearance may vary from piece to piece, enhancing the uniqueness of our products.
- 4) the "Natural" color is the base refractory concrete color as it comes straight from the molds. No coloration is added. "Natural" is tannish-gray in color.

These colors may be specified for any of our FireBalls, FireShapes or FireStones sets, **except White, which is only offered for FireStones (NOT FireBalls or FireShapes).**
