

THE AMISH HOUSE

Blue butterflies shown throughout our website indicate which tables can support the Butterfly Leaf Hinge option. The number of butterflies shows if a table can be built with 1 or 2 butterfly leaves. Each butterfly leaf is 18" in width and provides convenient self-storing.

Why butterfly leaves? Butterfly leaves offer the advantage of being self-storing without having to remove the leaves from the table. This removes the risk of damaging both table and leaves by inserting and removing traditional table leaves. Also, as we get older, lifting and removing heavy table leaves can sometimes become challenging. This feature makes expanding your table very user friendly and incredibly easy to use!

1

Pull table apart

2

Lift leaf and fold in half

3

Flip both halves to one side

4

Swivel leaf to fit below table and out of sight

Yellow butterflies throughout our catalog indicate which Single Pedestal tables support our exclusive Butterfly Leaf Hinge. Each butterfly leaf is 18" in width and provides convenient self-storing. You no longer have to fetch that table leaf from under the bed or in the closet! Super easy and convenient way to add table capacity when required, but cozy and comfortable for everyday use!

A unique way to self-store leaves in a Single Pedestal Table!

1

Begin with closed table

2

Pull table apart to reveal leaf

3

Lift leaf upright

4

Open leaf (like a book) and lay on frame

5

Push table together

6

No need for the heavy box usually found underneath single pedestal tables with our one-of-a-kind Butterfly Leaf

NOTE: Aprons are not available on Single Pedestal Butterfly Leaves

Note: Butterfly Leaf is NOT AVAILABLE in 42" Round tables unless noted otherwise

Our Butterfly Leaf is available with any single pedestal table with any table top shape in the following sizes:
