

# DYNAMIC DISPOSABLES™

## The New Face of Safety and Compliance Disposable Face Shields with a Reputation for Protection

The CDC suggests the use of a face shield when additional protection is needed to safeguard the entire face from infectious agents.

Dynamic Disposables Face Shield is a lightweight, disposable, cost effective product that provides extremely comfortable coverage. As an addition to our traditional line, we are proud to introduce the next generation of face shields with an easy-to-use snap-on disposable lens feature.

Unlike some systems that use an 'eye glass style' frame to support the shield, we deliver a more-comfortable, more-secure fit with our light weight frame which does not require a nose bridge. The full and half shields both use our Ultra-Clear™ Technology to prevent fogging, glare, and static electric buildup. The crystal clear plastic allows for excellent front and peripheral vision with protection you can trust.

Choose your protection from our original snug-fitting elastic band design or Palmero's new Snapeez™ Face Shields!

## Take Comfort in Compliance

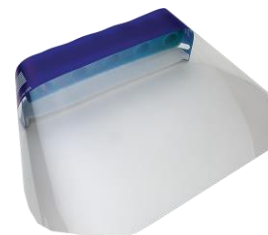

Our disposable full and half face shields offer the ultimate in PPE protection. The comfortable elastic fastener and ergonomic frame designs keep the lightweight shield secure without putting undo pressure on the nose or face. Surround frames with snap on shields are now also available. Both designs are extremely easy to use and remove, and fit comfortably over glasses or goggles. Because they are disposable, your shield is guaranteed to be scratch free for optimal visibility. For the ultimate in compliance, comfort, and convenience, Palmero Healthcare face shields clearly deliver superior protection for a stress-free procedure.
