

Look Out for New Eyewear from Palmero

ProVision®
PALMERO HEALTHCARE

Palmero is the leading safety eyewear brand providing an impressive range of trendy eyewear.

Introducing our newest ProVision® safety eyewear line with 9 new designs!

[Learn More](#)

This fall, [Palmero Healthcare](#) has all eyes on safety eyewear. That's because the company, a leader in dental safety eyewear, is expanding its ProVision®. New products will start rolling out in mid-September, with all of the new choices available by mid-October.

In all, there are nine new choices for protecting your vision during procedures. The Allure™, Air™, Element™ and Clarity™ are wraparounds that come in lightweight or ultra-lightweight options, with the Clarity also having enhanced anti-fog technology. Meanwhile, clinicians with short temples can ensure a secure fit with another wraparound choice, the Flexiwrap™. For a higher-end choice, consider the Infinity™, a wraparound with anti-fog and anti-static features and a pantoscopic tilt with telescopic and ratcheting temple arms. The arms allow for a customizable fit and optimal comfort.

The Eyesaver Sleeks™ goggles, which can be worn over prescription glasses, and E-Z Focals™ bifocals, are noted for being slick and stylish.

The Econo Loupes, a lightweight alternative to traditional loupes, have a 50mm magnifying lens for a fully enhanced field of view. These loupes also reduce eye strain and increase visual precision.

Palmero encourages clinicians to select safety eyewear that protects them from blue light, as well as spray, splash, splatter and even projectiles. All of these risks can cause permanent damage to the eye. To help evaluate the right eyewear for you, Palmero also has four categories all of its eyewear meets—you just need to find the right style for you.

- **Certified:** Meets industry standards and guidelines for lens, cornea and retina protection. Provides full coverage with wraparound. Is manufactured from high impact resistant materials and has lenses that filter out damaging blue light.
- **Clarity:** Has excellent optics and superior lens design for visual acuity, plus features anti-fog and scratch-resistant coatings.
- **Comfort:** Comes in a broad range of frame, temple, and nose bridge styles to provide an individualized fit for all-day security and optimal comfort.
- **Compliance:** Helps you adhere to safety protocols.

Protecting Clinicians, Patients, and the Practice

**RECYCLE/TRADE-IN
PROGRAM**

**Buy 1, Recycle 1,
Receive 1 apron hanger**

Go green with our eco-friendly and environmentally friendly X-Ray Apron Recycling/Trade-in Program

Simply...

1. Buy a new Palmero X-Ray Apron
2. Give us your old or unwanted apron of any brand to recycle
3. Get your FREE hanger!

New Recycling Program

Palmero is also making everyone smile with its new green initiative, its X-Ray Apron Recycling Program. The Environmental Protection Agency recommends recycling lead aprons, and now Palmero can help you do just that. If you send Palmero your old apron, the company will ensure that lead liners are sent for processing back to base material.

Palmero said the recycling program is part of its commitment to protecting patients and clinicians by also protecting the environment.

You can participate in the program if you're only looking for responsible disposal of aprons, but you can also take advantage of the trade-in element of the program and receive a free X-ray hanger. Simply purchase a Palmero X-ray apron and return an old one for processing, and receive your hanger (retail value \$18) from the company, so you can store your new apron in style.
