

Palmero Starting 2019 with New ProVision Options

[Palmero Healthcare](#) will be starting 2019 with new additions to its ProVision® line. Palmero released nine new styles over the back half of 2018 and is adding three more choices to address clinicians' varied needs in the operator.

Joining the ProVision line in January are Econo Tilts™, Mini Bonding Wraps™ and Rainbow™.

Palmero's Econo Tilts have a lightweight frame with tilting arms to ensure all-day comfort. Additional features like a firm nose pad and soft, rubberized temple tips, provide the support and grip you want.

Econo Tilts block up to 99.9% of UVA and UVB rays, meets the ANSI Z87.1 standard, and is available in both rose quartz and blue. The curved lens provides wraparound splatter and injury protection.

The other two new ProVision additions are designed help keep children safe while they're getting care. Not only does the American Academy of Pediatric Dentistry's Policy on Patient Safety encourage clinicians to protect these particularly vulnerable patients, it's also just common sense to protect kids from injury.

However, taking steps to minimize risk to kids hasn't always been as easy as it might have seemed. "We've learned that most dental offices are not aware that there are small pediatric sizes of protective eyewear that are ANZI certified," said Karen Neiner, President of Palmero Healthcare, LLC. ProVision Rainbow and Mini Bonding Wraps are now among those choices.

ProVision Rainbow combine safety and fun. These brightly colored frames are designed to fit smaller faces and have a scratch resistant, 100% polycarbonate gray tinted lens. The gray reduces the glare from harsh operator lights, which can help put youngsters at ease. Each pair blocks up to 99.9% of UVA and UVB rays. Your patient can choose from one of six colors in each pack of 12

Mini Bonding Wraps, a pediatric version of Palmero's popular version for adults, is a wraparound pair with an orange polycarbonate lens. This comfortable, lightweight option simultaneously prevents eye damage while also blocking blue light rays. The distortion-free, wraparound lens offers superior peripheral vision and protection, filtering up to 99.9% of blue, UVA, and UVB rays. The glasses are fog-free and scratch-resistant

**RECYCLE/TRADE-IN
PROGRAM**

**Buy 1, Recycle 1,
Receive 1 apron hanger**

Go green with our eco-friendly and environmentally friendly X-Ray Apron Recycling/Trade-in Program

Simply...

1. Buy a new Palmero X-Ray Apron
2. Give us your old or unwanted apron of any brand to recycle
3. Get your FREE hanger!

New Recycling Program

Palmero is also making everyone smile with its new green initiative, its X-Ray Apron Recycling Program. The Environmental Protection Agency recommends recycling lead aprons, and now Palmero can help you do just that. If you send Palmero your old apron, the company will ensure that lead liners are sent for processing back to base material.

Palmero said the recycling program is part of its commitment to protecting patients and clinicians by also protecting the environment.

You can participate in the program if you're only looking for responsible disposal of aprons, but you can also take advantage of the trade-in element of the program and receive a free X-ray hanger. Simply purchase a Palmero X-ray apron and return an old one for processing, and receive your hanger (retail value \$18) from the company, so you can store your new apron in style.
