PRESS RELEASE
For Immediate Release
December 2017

New Tablet Barrier Sleeve Provides Infection Protection from Harmful Pathogens

Palmero Healthcare, a Hu-Friedy subsidiary, is pleased to introduce the Palmero Tablet Barrier Sleeve to protect your portable, sensitive touch screen tablet devices. Don't risk contamination or damage to your devices. The single-use disposable sleeve provides infection prevention by mitigating cross-contamination of harmful pathogens.

The easy-to-use Palmero Tablet Barrier Sleeve protects equipment from harmful chemicals by minimizing disinfection requirements. The sleeve fits comfortably over a tablet with or without a case and is compatible with full or mini iPads and tablets.

Made of a material that does not contain latex nor impede touch screen operations, the sleeve has an adhesive on the flap to securely hold the tablet inside. The easy application sleeve accelerates operator turnover and prevents cross-contamination, minimizing disinfection requirements.

From eyesight safety to radiation mitigation wear, the Palmero Healthcare portfolio of products delivers infection prevention protection for your practice. For more information, visit palmerohealth.com, email customerservice@palmerohealth.com, or call 800.344.6424

Palmero Healthcare has been committed to bringing a wide range of infection prevention products such as hospital-level disinfectants, barrier products, and safety products to the dental community since 1957. With quality and reliable dental products, Palmero's goal is to become the recognized leader in infection prevention and safety products. We take pride in knowing that our legacy will continue to expand and flourish as a Hu-Friedy subsidiary where our MISSION is to provide infection prevention and safety products that protect clinicians, patients, and the practice.

Protecting Clinicians, Patients, and the Practice
