

BREATHE COOL, STAY SAFE

THE NEW DRÄGER X-PLORE® 1750 NIOSH-APPROVED PARTICULATE FACEPIECE FILTERING RESPIRATOR PROVIDES IMPROVED COMFORT AND PROTECTION

For ground personnel working in dusty environments, respiratory protection is essential. The Dräger X-plore® 1750 N95, our next-generation particulate filtering facepiece respirator, offers distinct improvements in comfort and protection. And it's now made right here in the US.

HIGH PERFORMANCE, LOW BREATHING RESISTANCE

The Dräger X-plore® 1750's CoolSAFE™ filter material combines low breathing resistance and high filter performance in one respirator. This respirator is approved in accordance to NIOSH 42 CFR Part 84, filtering at least 95% of certain non-oil based particles.

The soft inner layer is hypoallergenic and repels moisture due to its hydrophobic properties – keeping breathing resistance consistently low when used for longer periods of time.

EASY TO DON AND DOFF

The continuous loop head harness of the X-plore® 1750 is constructed from a stable, elastic textile strap that is easily donned and doffed – creating comfort with minimal pressure. The soft, tear-proof elastic easily stretches to fit various head sizes and prevent hair entanglement.

SPACE-SAVING STORAGE, EASY TRANSPORT

Dräger X-plore® 1750 NIOSH-approved respirators are flat-folded, saving space and making them easy to transport. Each respirator is individually packed and sealed in a plastic bag to keep it clean and hygienic.

Reusability	X (maximum one work shift)
Sizes	Universal
Approvals	NIOSH 42 CFR Part 84 TC-84A-9053
