

THE K-PAK

K-Pak by The Folding Boat Company

Need a light weight boat that you can assemble from a backpack in just 4-5 minutes? The K-Pak, from The Folding Boat Company, is a utilitarian boat that is designed to provide easy access to the water, anywhere, for fishing, hunting, photography, sightseeing, or just a leisurely paddle.

Unlike other boats, the rigid aluminum frame folds inside the boat skin. Only two pieces, a pair of cross frames, are added to complete the frame assembly. This boat is structurally sound, impervious to hard knocks, very comfortable, stable, light, compact in size, and unbelievably easy to assemble. She is, for her size, fast in the water, with minimal drag, and quite nimble. She's not built for heavy white water, or long term touring but most everything in-between. Use the camouflage cover, sold separately, and you have a great sneak boat for camera or gun.

K-Pak Specs

- Length: 9'3"
- Width: 30"
- Weight: 21 lbs.
- 280 pound displacement
- Backpack included

She's strong and stout but light. She's made from some of the best materials available today yet at less than \$900, she is affordable.

We designed our boat for portability, so you can take it anywhere. Now anyone with limited storage space can own a boat.

Construction Materials:

- Custom made Thermal Polyurethane fabrics
- 6061-T6 aluminum tubing inner frame
- All fabric seams are RF welded
