

MOVE

Big Joe can help improve how you MOVE materials in your operation.

Products like the E25, E30 and T15 can be used to replace manual equipment that requires physical labor to transport goods from point to point. By putting simple machines in the palm of your workers hands you can increase productivity and reduce costs from injuries and employee turn over while boosting morale. Products like the D40 can provide efficiencies on route deliveries due to the truck's small lightweight powerhead that enables the truck to operate effectively in trailers and retail store locations, while the simple rugged construction of the WPT45 and WRT60 can deliver low operating cost and high cycle performance.

E30
3,000lb capacity
Electric pallet truck
Permanent magnet drive motor

E25
2,500lb capacity
Electric pallet jack
Easy Exchange lithium battery pack

WPT45
4,500 lb capacity
Electric heavy duty pallet truck
Industrial battery box

D40
4,000 lb capacity
Electric delivery pallet truck
Double tap creep speed operation

WPT60/WRT60
6,000 lb capacity
Walkie rider pallet truck
Fork lengths up to 96"

T15
1,500 lb capacity
Walkie tugger
Integrates with common industrial carts

ACCESS

Big Joe can help improve how you ACCESS materials in your operation.

The Joey series of vehicles offer a great alternative to rolling ladders or larger equipment where elevation of personnel is required to complete a task. Compact and capable Joey series vehicles are highly maneuverable, intuitive to operate and an excellent equipment choice in support of general overhead maintenance, inventory or order picking duties. Vehicles like the J1-126, J1-162, and J1-192 can be combined with a cart to feed to pack stations or for manufacturing support, while the J2-72 and J2-126 will have you stop thinking backwards about forks forward operation given changes being driven by ecommerce in the supply chain.

J1-126/J1-162/J1-192 Joey
Task support vehicles
1,000lb maximum total vehicle capacity
Lift heights up to 192"
Optional towing of up to 2,500lbs

J2-126 Joey
Low level order picker
2,000 lb total vehicle capacity
Lift heights 126" forks
Forks forward operation, pallet clamp

J2-72 Joey
Low level order picker
2,000 lb total vehicle capacity
Lift heights of 48" operator, 72" forks
Forks forward operation, mini mast

STACK

Big Joe can help improve how you STACK materials in your operation.

Products like the M22, IBH, S22 and S30 can be used for basic warehousing in tight areas or as mobile work positioners to improve workplace ergonomics. Trucks like the PDS, CB22, CB33, PDC are a great way to supplement your fleet given their low operating cost, and can improve safety in work areas where high speed riders may pose a threat to personnel. Our PDSR30 is a popular hybrid vehicle that offers the best of both straddle and counterbalanced machines, while our V15, V18, and V20 three wheel forklifts deliver great driving characteristics and performance while keeping things simple. When you stack up all of the value that these Big Joe machines offer, it is easy to see that yeah... you could pay more, but you won't get a better truck.

M22
2,200lb capacity
Semi-electric straddle stacker
Fold down steer bar

IBH
1,000lb to 2,500lb capacity
Semi electric straddle stacker
Heavy duty straddle & fork over models

S22
2,200 lb capacity
Compact walkie straddle stacker
Permanent magnet drive motor, offset tiller
Optional fork over configuration

S30
3,000 lb capacity
Compact walkie straddle stacker
AC drive motor, offset tiller

PDS25
2,500 lb capacity
Walkie straddle stacker
Industrial battery box, Low mount tiller

PDS30/PDS40
PDS30 / PDS40
3,000 lb to 4,000lb capacity
Walkie straddle stackers
Industrial battery box, Top mounted tiller

CB22
2,200 lb capacity
Walkie counterbalanced stacker
Industrial battery box, low mount tiller

PDC25/PDC30/PDC40
2,500 lb to 4,000 lb capacity
Walkie counterbalanced stacker
Heavy duty construction, Industrial battery box

PDSR30
3,000 lb capacity
Walkie reach stacker
Pantograph mechanism, Power steering

V15/V18/V20
2,800 lb to 4,000 lb capacity
Electric three wheel forklifts
Solid pneumatic tires, 48v, AC drive motors

CUSTOM APPLICATIONS

All Big Joe pallet trucks, tuggers, stackers, and Joey series vehicles can be tailored to meet the needs of special applications.

By matching our equipment attributes to the repetitive tasks they perform we can deliver exceptional value with simple machines. Should you have a material handling challenge based on how you move, stack or access materials let us know.

Our PDI, PDM, and PDH trucks can often meet special requirements related to:

- Drum & Die handling
- Roll & Coil handling
- Ram & Boom attachments
- Hydraulic clamps & Load positioners
- Conveyor transfer via ball or roller platforms
- High density load handling via solid platforms
- Precision furnace loading and unloading

We can develop a solution for a wide range of requirements utilizing our whole line-up of Big Joe brand products.

- Route delivery applications
- Beverage order picking and distribution
- Rack to shelf solutions for retail distribution
- Specialty full pallet, half, pallet and quarter pallet handling
- Integration with cart and cart systems
- Omni-channel, e-commerce, and click & collect operations
- Flexible low level high density order picking solutions
