

The Big Joe Family of

MOVE

products is designed to increase productivity and reduce the risk of employee injuries.

P33
Pallet Jack
• 3,300 lb capacity
• Semi-Electric pallet jack

E30
Pallet Truck
• 3,000 lb capacity
• Powered pallet jack

D40
Pallet Truck
• 4,000 lb capacity
• Powered Pallet Jack

WPT45
Pallet Truck
• 4,500 lb capacity
• Powered Pallet Jack

WRT60
Pallet Truck
• 6,000 lb capacity
• Rider Pallet Jack

WALKIE TUGGERS

T15

"T" IS FOR TUGGER

Puts powerful towing capabilities in the palm of your hand. Designed to pull up to 1,500 lbs and handle a 7% grade when loaded, the T15 can eliminate physical strain that can result from moving carts and other mobile equipment in the workplace. Why risk injury pushing or pulling rolling loads when you can move more and hurt less with a T15 walkie tugger? After all, it isn't just those few moves but the cumulative work done in a day that can lead to injury, time off work and employee turnover.

Connects quickly and simply. The T15 comes standard with two front end tools, a frame grab and a pin style hitch. When using the frame grab, the operator gently rocks the unit forward and drives under a rolling load to connect. When using the pin style hitch, the operator can connect to a wide range of static or fold down loop connectors and slide over a top plate to capture a rolling load securely. For special requirements, optional custom front tooling is available.

T40

TWO TONS OF PULLING POWER

Built to move your heaviest loads. The T40 was designed to take on loaded carts and large mobile loads weighing up to 4,000 lbs. It can reduce physical strain and potential injury risks while freeing up other more expensive equipment like riding forklifts to perform the tasks which they were intended for, instead of towing carts from place to place. The T40's S2 60 minute rated electric drive motor with heavy duty transaxle housing delivers plenty of torque to move loads with confidence.

Longer run time equals greater productivity. The T40 features a 20AH polycase Li-ion maintenance free battery that delivers up to two hours of continuous operation. The external 110VAC charger can fully recharge the battery in just 2.5 hours. Add optional easy exchange batteries to achieve infinite duty cycles.

Capacity 1,500 lbs Vehicle weight 215 lbs Minimum turn radius 36"

Capacity 4,000 lbs Vehicle weight 625 lbs Minimum turn radius 36"

POWERFUL TRANSAXLE DRIVE

The T15 is powered by a 24v S2/60 0.5 horsepower transaxle drive that delivers travel speed up to 3.1 mph and solid motor braking.

EXCELLENT FEATURE SET

While simple in design the T15 comes standard with dual controls for infinitely variable forward and reverse travel, battery discharge indicator, integral batteries, a 110VAC charger, key switch, and horn.

EASY FLEXIBLE SET UP

T15 and T40 tuggers feature an adjustable mounting plate for front end tools. When tools are positioned correctly it can result in moderate weight transfer and the best performance.

POWERFUL TRANSAXLE DRIVE

The T40 is powered by a 24v S2/60 0.5 horsepower transaxle drive that delivers travel speed up to 3.1 mph and solid motor braking.

EXCELLENT FEATURE SET

While simple in design, the T40 comes standard with dual controls for infinitely variable forward and reverse travel, reversing belly button switch, battery discharge indicator, key switch and horn.

EASY EXCHANGE LITHIUM BATTERY SYSTEM

The T40 features a 24v 20AH Li-ion battery that fits into an on-board dock and external 110VAC charger. Optional additional batteries allow for infinite duty cycles.
