#### **HYDRAULICS**

The dashboard mounted lift and lower lever allow uncomplicated and precise load placement. Infinitely variable ball-type lowering valve provides a full range of lowering speeds for optimum control. Premium design lift cylinder provides smooth lifting and lowering. Pressure compensating flow control valve at base of lift cylinder regulates lowering speeds.

# Power Drive Counterbalanced Stackers

THIS SERIES REPRESENTS THE WALKIE LIFT TRUCK VERSION OF THE SIT-DOWN RIDER LIFT TRUCK. IDEAL CHOICE WHEN HANDLING OR STAGING A VARIETY OF LOAD SIZES.

# **ELECTRICAL**

All cables and wires are color coded and or numbered for easy service and tracing. Control circuits are fuse-protected, and use plug-in type connector.

Curtis® travel controller provides infinitely variable travel speeds with efficient use of battery power.

Hydraulic lift pump motor is specially designed for peak electrical efficiency at specific torque and rpm levels.

# **DRIVE SYSTEM and BRAKES**

Compact, open frame 24V DC drive motor provides ample torque and RPM at low current and temperature levels.

Direct drive full oil bath transmission, operates through a 25:1 transmission ratio to multiple the braking force.

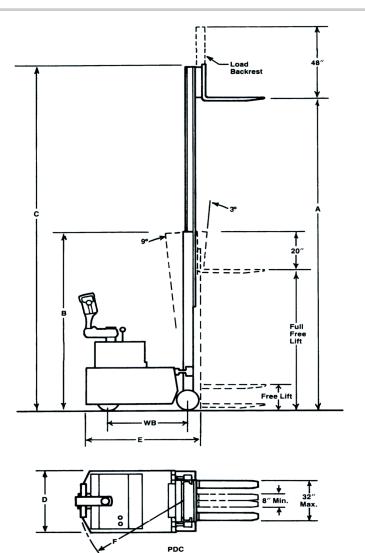

The drive motor, transmission, brake and drive wheel are coupled to the control arm via pivot tube that provides the operator direct control of all drive functions.

#### **ACCESSIBLITY**

Removal of one piece power head cover exposes major components for inspection and maintenance.
