Cut out this line

Drill these 4 corner
holes for mounting

2.81

$1\frac{7}{8}$

4.81
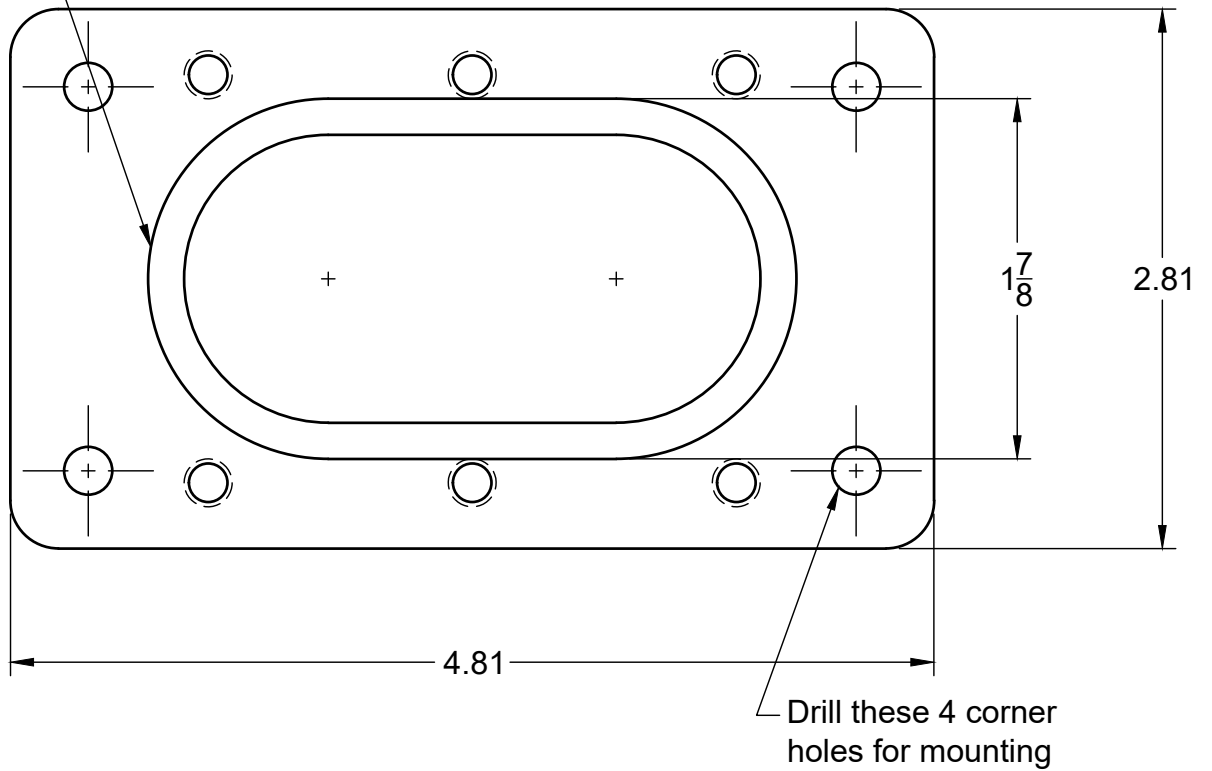

Make sure your printer is set to print at 100% scale and double check the
dimensions match the printed size. Mark the centers of the oval and the 4 corner
holes using the template and a center punch. Use a 1 7/8 in hole saw to cut these
out and then cut the straight lines between them to make the oval. We recommend
an air saw but a Sawzall or cutoff wheel will also work. The 4 corner holes get
drilled out to 5/16 in, we recommend using a step drill for this.
