

# THE INTERNATIONAL RING SIZE CONVERSION CHART

Use the circles below to judge the sizes against your existing rings. Make sure you line up the inside of your ring/ band with the circle to get a better idea of size.

## SIZING TOOL

Or try this finger sizing tool - Cut a slit along the top line and wrap it around your finger pushing the pointed end through the slit to see where it ends. Remember that the ring will need to be snug (*everyone has their preferred way of wearing rings with some not liking them to be too tight, especially for thicker bands*) but still needs to fit over the largest part of your finger.
