

Thyroid Boost

Strengthens & Boosts Underactive Thyroid Function

If you have an energetic pet that suddenly starts to slow down for no obvious reason, or if your four-footed fur kid is experiencing weight gain, lethargy and lack of desire to exercise, cold intolerance, dull dry hair, dry itchy skin, thinning coat and excessive shedding, it could be because his thyroid is in need of attention.

Every cell in your pet's body depends on thyroid hormones for healthy metabolism function, and low functioning thyroid issues are increasing in our pets, especially our dogs!

Some of the factors in low thyroid function are poor diet, especially processed grain and carb-loaded pet foods, over-vaccination, medications, pesticides, chemicals, herbicides, and toxins can negatively affect the thyroid. Middle age and older dogs, and certain medium to large breeds tend to have low thyroid function. Even pulling hard on their leashes or injuries to the throat can cause thyroid issues to develop.

The good news is that low thyroid function

responds well to the right nutrients. Thyroid Boost, created by Cedar Bear's Founder, a Clinical & Formulary Herbalist, L. Carl Robinson MH, RH (AHG), is an all-natural herbal dietary supplement that has been formulated specifically to provide important herb-based nutrients necessary to help support and activate thyroid function and help balance endocrine function.

The herbs in Thyroid Boost have naturally occurring essential building block minerals that not only support the health and function of your pet's thyroid, but helps strengthen overall health, as well!

Cedar Bear's alcohol-free TincTract® process makes the herbs both bio-available and bio-utilizable, so every drop goes right to work supporting your pets' health and well-being.

And like all Cedar Bear® herbs, Thyroid Boost is totally alcohol-free. It only has three things in it, herbs, glycerin, and water. Nothing else!

If your pet is experiencing low thyroid energy, get Thyroid Boost to give his health the boost he needs!

INGREDIENTS: Stinging Nettle Leaf, Horsetail Herb, Kelp, Bladderwrack Thallus, Irish Moss Thallus, Dulse Thallus, Shepherd's Purse Leaf/Stem, Fenugreek Seed, Black Walnut Hull, Sage Leaf.
