

Inline Touch Dimmer Switch

Inline dimmer is a simple one touch dimmer for LED lights. It provides smooth dimming with the touch of a finger, as well as the power on/off function.

Features

- Operating Voltage: DC 12-24V.
- Connect single color LED light to the DC power adapter, to adjust brightness by long press, and switch on/off by short press.
- Convenient to install, DC standard male and female jack connector, plug and play.
- Suitable for controlling a variety of monochrome lamps with LED as the light source.
- 2 years warranty.

Specification

Model No.	Input Voltage	Output Power	Rated Current	IP Rating	Certificates	Body Color
