Installation Instructions

1. Before cutting the LED strips, always measure and calculate the length and check the splitting lines on the strip which shows you where to cut on the LED strip light.

Connecting Accessories

End Cap GL-WW-EC-C

Power Lead GL-WW-PL-S

Connection Instructions

1. Take out the already cut wall washer strip light. Then use a screwdriver or other tools to leave a gap (A1) between FPC and PU tube.

3. Fill the gap between the connector and the wall washer strip light with UV glue. Wipe out any excessive glue that is not in the gap.

GL LED LLC reserves the right to modify this Instruction without prior notices.

2. When cutting the LED strips, make sure to always cut into the splitting lines on the strip. The electrostatic ring is needed at this step.

Splice Connector GL-WW-SC-S

Jumper Connector GL-WW-JP-S

2. Insert the PINs of any connector in connecting accessories listed above into the gap (A1) all the way in.

4. Use UV lamp to light up around the connection joint, until th glue solidified. (It is recommended to wait over 10 seconds with industrial UV lamp).
