

NURSE ANESTHETISTS

Helping New Mothers Feel Only Joy

Having a baby is one of the most thrilling experiences a woman can have. It can also be one of the most intimidating. Managing the pain of delivery is a concern shared by many expectant mothers. When it comes to obstetrical pain relief and anesthesia, you do have options. Your Certified Registered Nurse Anesthetist (CRNA) is happy to explain them to you. Each year in the United States, CRNAs provide safe pain relief and anesthesia care for millions of women in labor.

During National CRNA Week, CRNAs celebrate motherhood with a simple message:
We want you to feel only joy when your baby arrives.

Celebrate National CRNA Week
January 21-27, 2018
