Turn your love for cooking

into a passion

EXPERIENCE THE DI LUSSO DIFFERENCE!

Di Lusso with the meaning "Of Luxury", presents to you a collection of opulent appliances that will turn your passion for cooking into a creation.

Di Lusso Appliances showcases the latest in kitchen technology and style. Our niche collection embodies premium quality with intuitive features to inspire your kitchen and your cooking.

WHY DI LUSSO APPLIANCES?

Di Lusso Appliances offers European style, value added features and designs, with you in mind.

Our collection includes built in ovens, freestanding cookers, designer steam ovens, gas and ceramic cooktops, warming drawers, stainless steel dishwashers and practical rangehoods. Everything a serious home cook would want.

OUR STORY

Di Lusso is a brand of Shinda International, who are renowned for reliability and superior customer service in the Australian market. Shinda International has been manufacturing and marketing for the Australian and worldwide markets since 1995.

Through strategic investments and joint ventures, Shinda International has control over its supply chain starting from manufacture through to the delivery and servicing of their products.

Our confidence is demonstrated by offering a **3 years manufacturer's warranty** on all appliances.

Ovens

Experience the
Difference

FINGERPRINT RESISTANT STAINLESS STEEL*

Keeps your oven exterior shiny and free of marks. Any stains can be removed with an easy wipe.

TRIPLE GLAZED DOORS

Triple glazed doors are an added safety feature as 3 layers of glass leaves the oven door cool to touch.

Di Lusso, giving you peace of mind when you have small children who are interested in "What's cooking?"

TRUE FAN FORCE

All Di Lusso ovens have a true fan force function even our most basic model. Fan force functionality, unlike fan assisted, has a circular heating element at the back of the oven, where the fan circulates heat evenly inside the cooking chamber, cooking your food evenly.

Di Lusso also does not consider the light as a function, so a 7 function Di Lusso oven has 7 cooking functions.

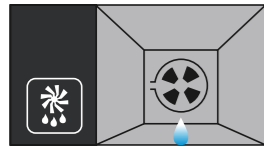

TELESCOPIC RAILS*

Telescopic rails allow the oven rack to extend right out, making it easier for you to baste your food, check on the cooking progress and remove the baking tray. Most **Di Lusso** ovens include two wire racks and a baking tray, giving you flexibility to cook on all different levels.

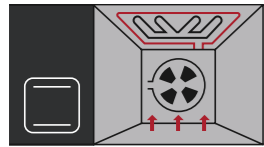

*featured in certain models only.

OVEN FUNCTIONS

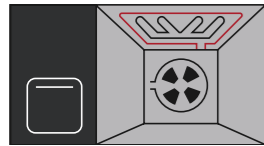

Defrost

The fan operates without the heating elements. Can be used to defrost frozen food. The required time for defrosting depends on the type and quantity of food, and the room temperature. Always check food packaging for instructions. (All models)

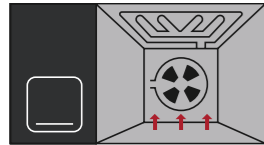

Conventional

The traditional way of cooking, using the bottom and top outer heating elements to provide heat from above and below. It is ideal for pastries and for slow cooking at a low temperature. Best positions are shelf levels 2 and 3. (7, 8 & 9 functions models)

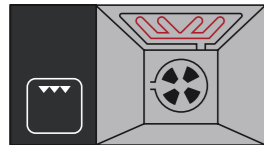

Top Heat

Top outer heating element radiates heat down directly to your food, giving your food a golden brown finish. Also suitable for gentle cooking and reheating meals. (9 function model)

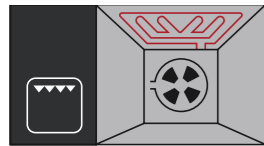

Bottom Heat

Operates the bottom heating element, for more focused heat and control. Use this function to achieve crispy bases in pies and pizzas. Also suitable for slow cooking or reheating meals. (8 & 9 functions models)

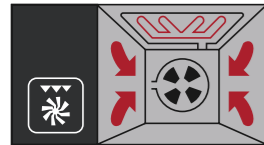

Half Grill

The inner top heating element operates. Provides direct heat to the top surface of the food. It is suitable for small portions of foods, e.g. toast. Keep oven door closed when in use. (7,8 & 9 functions model)

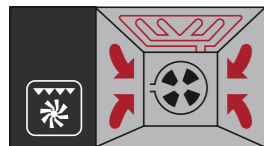

Full Grill

Both outer and inner part of the top heating element operates. It is more suitable for grilling larger portions of foods than the half grill function, e.g. sausages, steaks, fish. Keep oven door closed when in use. (4, 7 & 8 functions models)

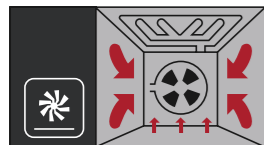

Half Grill + Fan

With fan assisted, the inner top heating element is able to give a very generous coverage of the grill tray from rear to front. Suitable for cooking small portions of food. (9 functions models)

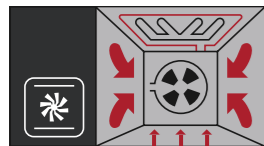

Full Grill + Fan

Both inner and outer part of the top heating element operates with fan assistance. The fan disperses the radiant heat from the elements. Suitable for browning food, whilst keeping it moist. The door must be closed whilst grilling. (4, 7 & 8 functions models)

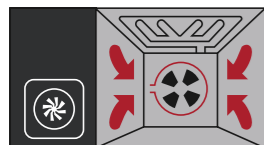

Bottom Heating + Fan

Bottom heating element operates with fan assistance. It is perfect for dishes with a pastry base and filling, such as custard tarts. It is also suitable for heating precooked foods, or to sterilize preserving jars. (7 & 9 functions models)

Top + Bottom Heating Element + Fan

Provides even heating with the top and bottom element and the fan operating simultaneously. Food will be browned on top and heated from the bottom. (8 functions model)

Fan Forced

The circular heating element and the fan comes into operation. Heat is distributed evenly to all levels. Several dishes can be cooked on different shelves. Fan forced mode is ideal for baking, cooking large serves of food and cooking different dishes together. (All Di Lusso models)

Steam Ovens

LOCK IN THE NUTRIENTS WITH STEAM COOKING

Steam offers a healthier way of cooking. Nutrients are not lost, food is moist and the steam oven is ideal for those who prefer not to use a microwave.

Di Lusso combi ovens and steam ovens have one of the largest capacities in the market. You can cook on several levels at a time and our combi ovens give you the benefits of steaming and baking in the one oven.

The advantage of steam cooking is that food smells are not transferred, so you can steam fish, vegetables and rice together without it all smelling like fish. A three course meal can be cooked together.

Our water reservoir is built into the steam oven, giving you a larger cooking chamber. The reservoir is easily topped up via the patented push and pop out spout. The reservoir can be easily topped up during cooking, a warning bell will ring advising you to top up with water. This can be all done without interruption to the cooking process.

All Di Lusso steam ovens come with a stainless steel rack and a perforated and solid steaming tray, giving you options to cook on all levels.

There are both built in and table top models available.

Di Lusso -
designing with
you in mind.
