FOX TRAP

SETTING INSTRUCTIONS

Parts list:
- 1 x Fold Flat Fox Trap
- 15 x cable ties
- 2 x securing rods for front door
- 1 x long mechanism / trigger rod

Assemble on a flat surface

1. Pull one side up to open and form the trap.
2. Pull up the rear door / back plate and clip into side hooks. Close and secure the bait door. (This will help the trap hold its shape)
3. At the front of the trap firstly lift the mesh frame up from the inside. Line this up with the eyelets at the top (about 7 squares back from the front of trap)
4. Take 1 x securing rod and push through the 4 lined up eyelets.
5. Take the other securing rod and secure the front and base by pushing it through the 4 eyelets.
6. Attach the trigger rod making sure it is threaded through the loop on the top of the trap. Attach the bar to the hook using the split pin.
7. Place a lure on the hook
8. To set the trap lift the door up and place the long trigger rod through the weldmesh strip. (SEE PICTURE)
