Quill 250L Tank Drinker

Made in Dorset

We manufacture the Quill Tank Drinkers at our site in Dorset from durable, high quality HDPE using low-waste processes.

SPARES & ACCESSORIES

The perfect low maintenance set up

Our Quill Tank Drinkers can be fitted with a Ballvalve Arm & Float and connected to the mains water for easy refilling.

Plastic Float 4 1/2"

1/2" H/P Pt 1 Ballvalve Arm

Tank Cap

Quill Tank Drinkers disconnected from a mains supply will be fitted with a basket filter to prevent debris from entering.

Why use a nipple drinker?

Nipple drinkers reduce cross contamination of disease, make drinking easier for birds and keep the drinking water sealed & hygienic.

BENEFITS

- ✓ Stands at **optimum height** for birds to drink easily
- ✓ Shiny nipples **attract birds to drink**
- ✓ Dark olive colour **prevents algae growth**
- ✓ Sealed nipple systems **prevent the spread of disease**
- ✓ **Eliminates spread of AI** from wild birds via drinking water

Did you know?

Birds must tip their heads back to swallow, and will drip contaminated water back into open drinkers as they go to drink again from a low level.

Our nipple drinkers are designed at the perfect height for birds to tilt their heads back and drink easily with no chance of cross-contamination.
