- ✓ Non-staining
- ✓ Economical 1:250 general dilution rate
- ✓ Ideal for use in all types of animal housing
- ✓ Can be used for wheel & vehicle disinfection at a 1:250 dilution rate
- ✓ Can be used in hot or cold water

COMPOSITION

Contains a blend of peracetic acid, hydrogen peroxide, acetic acid & nonionic surfactant.

 **MADE IN
BRITAIN**

 **20L**

APPLICATIONS

POULTRY HOUSE & PIG PEN/ ROOM DISINFECTION:

Disinfect all cleaned surfaces by spraying with Vanodox® Formula solution. Allow to dry before re-installing cleaned and disinfected equipment.

DRINKING WATER SYSTEM: Drain the system and flush with clean water. Fill with a 1:250 solution of Vanodox® Formula and leave for 30 minutes.

PORTABLE EQUIPMENT: Immerse in a container filled with Vanodox® Formula for 30 minutes. Remove from disinfectant and allow to dry in a clean area before re-installing.

May be used at dilution rates between 1:25 & 1:800 in hot or cold water according to specific pathogens involved, as well as the level of residual soiling at the point of use.
