By default, the analytical cookies using the entire IP address of website users to provide general geographic data in the reports.

It is possible to disable Google Analytics cookies using a specific plug-in available at the following link: <https://tools.google.com/dlpage/gaoptout>

Facebook Analytics works with third-party partners who help provide and improve Products or businesses who use Facebook Business Tools to grow their businesses. Facebook doesn't sell any of your information to anyone. Facebook also imposes strict restrictions on how their partners can use and disclose the data they provide.

Facebook Analytics provides aggregated statistics and insights that help people and businesses understand how people are engaging with their posts, listings, Pages, videos and other content on and off the Facebook Products. Facebook Analytics aggregates your information to provide analytics and measurement reports.

Facebook Analytics provides advertisers with reports about the kinds of people seeing their ads and how their ads are performing, but they don't share information that personally identifies you (information such as your name or email address that by itself can be used to contact you or identifies who you are). For example, Facebook Analytics provides general demographic and interest information to advertisers (for example, that an ad was seen by a woman between the ages of 25 and 34 who lives in Madrid and likes software engineering) to help them better understand their audience. Facebook Analytics also confirms which Facebook ads led you to make a purchase or take an action with an advertiser.
