## Setting the standard for comfort and quality

### PRIMARY INDUSTRIES

### IDEAL APPLICATIONS

- Biotechnologies
- Medical device manufacturing
- Laboratory analysis
- Pharmaceuticals
- Flat panel industry

### PACKAGING

91-225, 91-250, 91-325:

The glove is packaged one pair per poly wallet, sealed in a poly envelope; 10 pairs per sealed polybag; 5 sealed polybags per master polybag; 4 master polybags per lined carton; 200 pairs per carton. All packaging is printed with cleanroom-compatible IPA-resistant ink. The gloves are triple-bagged for superior contamination control. The polybags have an easy-tear opening

### DESCRIPTION

- As the industry resorts to frequent glove changes more and more often, the 91-250 has an inner silicone coating that facilitates easy donning and double-gloving. The cuff is slightly thicker, nicely fitting over the garment.
- The 91-250 glove is comprised of a specific formulation of latex that provides increased flexibility and elasticity. The glove's thinner fingertips, combined with the bisque finish, provide greater sensitivity, increased handling precision and dexterity.
- AccuTech® gloves provide optimal solutions for controlled and sterile environments, respectively.
- The gloves are made with a specific natural rubber formulation that offers a high level of comfortable, sensitive, precise handling.
- Their low allergenic content minimises the risk of latex associated allergies for the wearer.
- With their excellent technical properties, these gloves can be used for a wide range of applications and in several environments.

**CATEGORY III**

## Natural Rubber Latex

Print date 26-11-2015

### Glove material

- Natural rubber latex (Coating material)
- N/A (Liner material)

### Possible Harmful ingredients

#### Sensitizers

- Natural rubber proteins
- Zinc Diethyldithiocarbamate
- Dipentamethylenethiuramtetrasulphide

Only a very small number of users may be sensitised to this ingredient in the glove and hence may develop irritant and/or allergic contact reactions.

#### Reach Regulation 1907/2006

For more information, please consult the REACH statement on the Ansell website

### Properties

- Excellent physical properties
- Outstanding finger dexterity
- Every glove undergoes a special hypoallergenic process to minimise sensitivity reactions
- Very good puncture resistance
- Sterile

### EN Test Data

#### Liquidproofness:

Acceptable Quality Level 1.0 or EN performance level 2

#### Chemical permeation:

For more information on chemical permeation, please consult Ansell website

### European conformity

Gloves conform to the requirements of the European Directive 89/686/EEC and to the European standards EN 420:2003 + A1:2009 and EN 374:2003

They are categorised in "Complex Design" (= Protection against mortal risks).

EC-Type Examination Certificate and EC-quality control for the final product by

Centexbel  
Technologiepark 7  
B-9052 Zwijnaarde

### Application - Limitations of use

Do not use for mechanical nor extended chemical protection Hand & product protection

### Storage

Keep away from sources of ozone or ignition.

Keep out of direct sunlight; store in a cool and dry place.
