## The most advanced glove solution in allergy prevention

### PRIMARY INDUSTRIES

### IDEAL APPLICATIONS

- Aseptic drug manufacturing
- Biotechnologies
- Medical device manufacturing
- Handling of cytostatics

### PACKAGING

#### 73-711:

Pair pack: The glove is packaged one pair per poly wallet, sealed in a poly envelope; 10 pairs per sealed polybag; 5 sealed polybags per master bag; 4 master bags per case liner; 200 pairs per carton. All packaging is printed with cleanroom-compatible IPA-resistant ink. The polybags have an easy-tear opening. The gloves are triple-bagged for superior contamination control. 73-721:

Bulk pack: 20 right and left hand gloves are packed in separate compartments in an easy-to-open polybag with perforated line opening; 1 polybag per vacuum sealed polybag; 2 polybags per vacuum sealed master polybag, 5 master polybags per case liner; 200 pairs per carton. All packaging is printed with cleanroom-compatible IPA-resistant ink. The gloves are triple-bagged for superior contamination control.

### DESCRIPTION

- Made of poly-chloroprene, DermaShield® is the most technically advanced sterile glove available today.
- Free of latex proteins and accelerators, it minimises both Type I and Type IV allergies associated with natural rubber.
- While DermaShield® has the comfort and flexibility of natural rubber gloves, at a similarly competitive price, its neoprene composition offers better chemical resistance. And the new beaded cuff prevents the glove from rolling down, providing increased protection. DermaShield®: for optimal product and worker protection.
- The DermaShield® 73-711 is sterile.
- The DermaShield® 73-721 is available for non-sterile controlled environments.

### REMARKS

- Complies to EN455 parts 1 and 2

**CATEGORY III**

## Neoprene

Print date 26-11-2015

### Glove material

- Neoprene (Coating material)
- N/A (Liner material)

### Possible Harmful ingredients

#### Sensitizers

- No sensitizers

#### Reach Regulation 1907/2006

For more information, please consult the REACH statement on the Ansell website

### Properties

- Excellent physical properties
- Outstanding finger dexterity
- Chlorinated on the outside and PUR-coated on the inside
- Contains silicone

### EN Test Data

#### Liquidproofness:

Acceptable Quality Level 0.65 or EN performance level 3

#### Chemical permeation:

For more information on chemical permeation, please consult Ansell website

### European conformity

Gloves conform to the requirements of the European Directive 89/686/EEC and to the European standards EN 420:2003 + A1:2009 and EN 374:2003

They are categorised in "Complex Design" (= Protection against mortal risks).

EC-Type Examination Certificate and EC-quality control for the final product by

Centexbel  
Technologiepark 7  
B-9052 Zwijnaarde

### Application - Limitations of use

Hand & product protection

Do not use for mechanical nor extended chemical protection

Glove protects from radioactive contamination outside of containment enclosures

### Storage

Keep away from sources of ozone or ignition.

Keep out of direct sunlight; store in a cool and dry place.
