

Kimberly-Clark's RIGHTCYCLE* Programme

Your company needs an effective solution to mitigate waste and help you reach your Corporate Social Responsibility (CSR) and Sustainability goals. The best solution for your business is the RIGHTCYCLE* programme by KIMBERLY-CLARK PROFESSIONAL.

Kimberly-Clark have resolved the recycling process – beyond downcycling, upcycling and other ideas – with the right way to recycle. RIGHTCYCLE* makes it easy to recycle previously hard-to-recycle products like cleanroom garments and gloves. Now the garments and gloves from KIMBERLY-CLARK PROFESSIONAL* used in your facility can be turned into a variety of useful eco-friendly products. RIGHTCYCLE* is good for your business and good for the environment.

The RIGHTCYCLE* process from distributor to park bench:

1. The product is worn in your facility
2. Waste is collected on site from each collection point
3. Waste is sorted and processed at recycling partner
4. Materials are integrated into new eco-friendly products, such as benches, tables and chairs.

What can be recycled?

All of Kimberly-Clark's products are included in the RIGHTCYCLE* scheme. Both latex and nitrile gloves are included, as well as garments such as coveralls, shoe covers, armlets and hoods etc.

Pricing Structures

There are two RIGHTCYCLE* methods available to customers.

Large Volume Customers:

- This is a customer specific programme and is offered for FREE
- Sign up of a customer needs to be approved by Kimberly-Clark (approval is based on customer profitability)
- Implementation is guided by a Kimberly-Clark representative
- The customer must organise the internal collection of gloves/garments based on their existing practices
- The customer collects gloves/garments in central collection point in their building
- After the customer has filled the pallets, they must agree, with Kimberly-Clark, when to pick up the pallets

Restriction: Gloves/garments need to be collected with maximum pallet measurements – Euro Pallet = 100 x 80 x 200cm or UK Pallet = 100 x 120 x 200cm.

Average weight of a full pallet:

- Gloves: 143kg EU, 214kg UK
- Garments: 110kg EU, 164kg UK

Small Volume Customers

- Distributor orders boxes, from Kimberly-Clark, for 60 euros
- Customers can then order their own boxes through distributors
- Customers must then sign up to the Terracycle website
- Once the box is full (70 garments or 3,600 gloves), the customer should then call/email Terracycle and the box will be collected (boxes are branded and labelled with instructions for collection)

For further information, please call us on 01444-484044 and we would be happy to explain the programme itself, and its benefits to your company.
