## High Risk Exam Nitrile Gloves

### DESCRIPTION

- Extended cuff provides additional protection for the wrist and arm for hazardous environments. Advanced nitrile formulation offers up to 3 times the puncture resistance of latex or vinyl disposable gloves. Combined with the lowest acceptable pinhole rates (AQL 0.65) these gloves help set a new standard in protection.
- Non-stick properties are built into the glove formulation to create a resistance to tape or adhesives, and to assist workers with improved efficiency and speed.
- Textured fingers ensure strong, efficient grip and excellent worker protection.
- Constructed without natural rubber latex materials or powder to help protect from allergies, skin irritation and dryness.
