NEW MODEL ANNOUNCEMENT – N SCALE

53' Corrugated container with 6-42-6 sides

This New Tooling of a Jindo Prototype will feature the JTC magnetic connection system and ISO connecting pins at the 40' ISO location, for compatibility with all other JTC containers, the Atlas 40' standard container, and all Prototype stacking configurations. Expected Winter 2018.

JTC's first 53' container is being tooled with two different fronts, and Five different door ends. This will allow for many variations and paint schemes to match prototype pictures, including many Canadian based companies. Liveries may include: APL, CSX (multiple schemes), CANADIAN TIRE, CP, PACER, TOTE, HUB GROUP, YANKE, CLARKE, CN, EMP (Pacer & Hub Group patch), STAX, SEA STAR, CROWLEY, SWIFT, UMAX (CSX, STAX patch units), + OTHERS.

FRONT ENDS WILL BE THE 8-SQUARED RIB STYLE AND THE 7-WAVE STYLE CORRUGATIONS
