II/2022

38510 PRR 25-Ton Diesel Battery R/C w/Sound

All 25-Ton models on this page include another industry-wide first from PIKO... battery-powered, factory-installed R/C, PLUS remote control sound functions! (Batteries not included.) These models include a new sound system created by TCS and PIKO America. The sound can be triggered using the pocket remote, making this yet another first in the industry from PIKO. See page 37 of the catalog for more details.

The 35042 R/C Loco Receiver takes onboard PIKO R/C to a new level!

II/2022

35042 R/C Loco Receiver 5A, Pure DC w/Remote

- › The Receiver provides up to 6A peak power (5A continuous duty rating), with a "Pure DC" output safe for the Analog operation mode of most DCC decoders, including the popular PIKO 36220 steam sound decoder kit.
- › The Receiver board is designed for easy installation inside many G-Scale locos. The Receiver board measures 3.38" x 2.16" x 1.06" (86x55x27mm)
- › Includes two relay-type function contacts for controlling horn/whistle and bell on a separate sound unit.
- › The built-in rectifier allows the Receiver board to operate on 12-18V AC / 12-24V DC 6A power supply, from either onboard batteries or constant track voltage.
- › Includes Mode switch to select voltage output range, starting either at 0.5V for locos without internal voltage drop circuits, or at 6V for decoder-equipped locos with a higher startup voltage.
- › Receiver PCB includes wiring access cut-out for easy installation in locations such as tenders with wires coming up through the floor.
- › Easy screw-terminal connections for motor, lighting and two function outputs.
- › 8 selectable R/C channels. Set up to 8 different locos to different channels for independent operation, or set any number of locos to the same channel for multiple-unit lashups.
- › Includes 35041 Pocket Remote

37850 Self-Unloading Hopper DR IV

During the 1920s, the Deutsche Reichsbahn received their first self-discharging hopper cars that were used for ballast service. The biggest innovation on these cars was a sophisticated system of hand-controlled chutes that allowed the operator to direct the flow of ballast to the inside or outside of the rail. When designing our G scale Otm hopper car, we decided that we would include this same feature on our model! You too can spot our G scale Otm at a worksite on your Garden railroad, and dump sand and fine gravel on your G scale right-of-way using the Otm's miniature chutes.

II/2022

37841 Measuring Car Pwg 88

PIKO introduced the Outstanding smart measuring car in HO-Scale and ever since G-Scale enthusiasts have been asking for this innovation as well. Now PIKO has provided! You can now measure your entire garden railroad accurately from measurements of scale miles all the way down to a centimeter. Track gradients can also be measured. All measured data can be displayed in realtime on the SmartPhone app (Android or Apple iOS) or the PC app. Additional data like the average train speed can be saved and analyzed on your PC. Data is measured from every inch of trackage, not just visible track, and the high-tech Measuring Car is based on actual DB AG Geometry Cars including prototypically accurate paint scheme and factory-installed interior lighting.

37970 Building Block Car (Building blocks not included in the package)

The imaginations of young (and not-so-young!) model railroaders should run wild at the thought of a train car that can be built and rebuilt any way they want it with the new PIKO building block car. Aspiring model railroaders can use their favorite building blocks; the possibilities are endless! Whether they are by themselves or with family and friends, younger modelers will always be creating new works of art on the building block car. Model railroading with PIKO has never been more fun!

PIKO

Another 1st, only from PIKO! 25-Ton diesel locos factory-equipped for full battery-powered operation, with PIKO R/C and realistic digital sound built-in. Run the train over any track, ring the bell, blow the horn - all controlled from the easy and convenient Pocket Remote included with the loco. See page 37 of the catalog for more details.

Our 38109 WP&YR Freight R/C Starter Set comes complete with an 0-6-0T steam loco, two freight cars, a circle of PIKO G-Track, and the convenience of PIKO R/C control with a pocket remote.

Our new 38234 D&RGW Mogul #214 features great-working smoke, directional lights, and a fantastic digital sound system, with extensive features on Analog DC as well as DCC operation.
