Dear Customer,

Congratulations to you for having chosen this great product. SambaRX Stability Seat will be your health companion for years to come.

You are excited and can't wait to start using this wonderful product. But to benefit the most from this product, please FIRST carefully read all content of this User Instructions.

For your benefit, the following are tips we wish to emphasize:

1. Before inflating this device, please lift the cap up slightly, till your fingers feel the weight of this device, and inflate while lifting.
2. The first time you try it, please blow only 0.5 - 1 light breath of air to inflate the air chamber. Then, you are free to experiment with the level of inflation.
3. LESS is MORE. LESS inflation often means MORE comfort.

Holding and lifting the cap

No touch of lips on valve while inflating

HOW TO ENJOY...

Sooth and ease your back, improve sitting posture, enhance core stability, prevent pressure points, and protect your coccyx and prostate gland,

1. Inflate your SambaRX as advised in "How To Adjust ...".
2. Place it flat and centered on your chair with its rear edge (see image on opposite page) about 1 inch away from the back of the chair.
3. Sit gently and centered on SambaRX. Ensure your tailbone aligned with SambaRX rear edge, feet on the ground, and your body not touching the back of the chair. Also see advices in "Warning"
4. There is no need to move or rock. Just sit naturally and do your work as you please. And let SambaRX do the rest.
5. Make sure you properly control your body balance.

HOW TO EXERCISE... (Suggestions Only)

Balance and rock

1. Sit on your SambaRX in a chair the same way as you normally do, and with the same level of inflation you normally use. Maintain your balance.
2. Gently rock your pelvis forward then back to neutral, then backward, then back to neutral, and repeat this procedure for 10 to 20 times.

1. Same as point 1 above.
2. Gently rotate your pelvis clockwise, like doing belly dancing, and repeat this procedure for 10 to 20 times. The do this counter-clockwise for 10 – 20 times

1. Same as point 1 above.
2. Gently rock your pelvis towards left then back to neutral, then towards right, then back to neutral, and repeat this procedure for 10 to 20 times.
3. While you are rocking towards left, gently lift your left shoulder as high as possible and drop down your right one as low as possible simultaneously, then reverse the motions, and repeat this procedure for 10 to 2 times.

HOW TO TROUBLE SHOOT ...

Feel uncomfortable when sitting on this cushion?

1. Most likely you need to reduce the level of inflation, since over 95% of all users tend to over inflate the cushion. Also make sure that your tailbone is aligned with rear edge of the cushion, you are sitting on the cushion no more than 15-30 min initially, and your chair is not tilted forward.
2. Make sure that the valve and the semi-circle are aligned with the rear of your buttocks while sitting on the cushion, and that your cushion is in the middle of your chair.
3. Also make sure that you sit in the center of the device, like sitting on a stability ball.
