

CACTUS™

VORTEX

User Manual

SOFTWARE COMPATIBILITY

iOS 9.0 & Above

Android 4.4 & Above

Supports Bluetooth 5.0

www.cactuswatches.com

Setting

Use Da Fit App on iOS or Android smart phone to set the VORTEX as follows:

Note: hardware and system of watch should meet the below requirements:

iOS 9.0 & Above

Android 4.4 & Above

Supports Bluetooth 5.0

1. Download Da Fit App

Search and download the Da Fit App from the Apple Store or Android App store

Scan the QR code below to download and install Da Fit

2. Charging your Watch

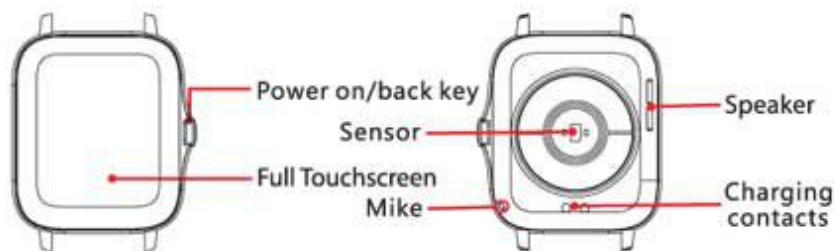

Before using your CACTUS VORTEX ensure it is fully charged.

Attach the supplied charging cable to the metal points on the back of the watch, the charging cable has magnetic suction and will adhere to the charging points. Connect the other end of the charging cable to a USB wall charger, or computer USB port. Charge for 2 hours until battery fully charged.

You are now ready to wear the CACTUS VORTEX. Adjust the length of the band and fasten the watch around your wrist.

3. How to Use

Press and hold the power-on key (right key) to turn the watch on.

Swipe the screen up/down, right/left to enter different interfaces.

Tap/click on a selected interface to enter/confirm the selection.

Short press the right key to return to the previous interface.

4. Pairing your watch

The VORTEX is a dual Bluetooth call watch. To use it correctly, one must connect twice, once in the App with Bluetooth and once in the mobile phone (audio) Bluetooth.

App Connection (for data transfer)

Make sure Bluetooth is **ON** in your mobile phone and open the Da Fit App on your mobile phone.

The first time you use the VORTEX smart call sports watch, you will be asked to complete your personal details in the App to calibrate the device - your gender, age, weight and height. The App will prompt you to add a

device and prompt you to allow notifications. The App will auto search until it finds the watch - keep the watch close to the phone and click on the searched device T42 to connect & pair with your mobile phone.

Mobile Phone Connection (for calls)

Turn on the audio switch of the watch - swipe down in the main interface of the watch, enter the control centre, tap the audio switch icon (phone: on) and turn on the audio status as shown.

Go to the mobile phone Bluetooth search page, search and connect Audio_T42

PAIRED DEVICES

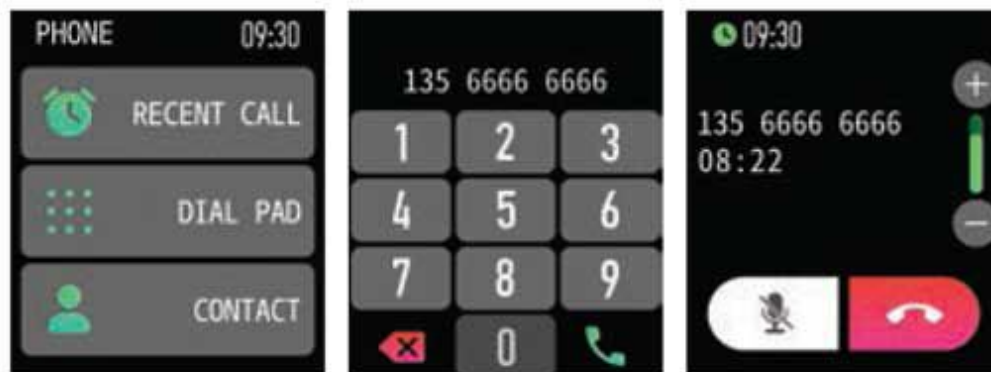

The Bluetooth page in settings will show T42 connected and Audio_T42 connected.

After the watch is successfully bound / paired, the App will automatically save the Bluetooth address, and the watch will automatically connect to the phone. Data can be synchronised by pulling down on the client data page in the App.

The VORTEX smart watch saves 7 days of data offline. Please ensure the App is opened so that synchronization of data can occur, and historical data can be viewed in the App.

To change the time presentation from 12/24 hours, and to choose metric or imperial measurements, go to the App, go to Others, go to Time formats or go to Unit formats. To change watch faces, go to the App, go to watch faces and select.

5. Introduction to the call function

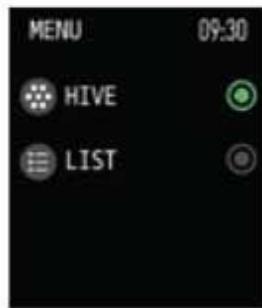

When your watch is connected to your phone, you can use your watch to make calls (dial-control your phone), or you can answer calls to your phone on your watch, or reject calls to your phone on your watch. You can also view your watch's call history. When using the call function, the watch needs to be connected to the phone in a stable state (Bluetooth connected). Note: audio does not turn on when the watch battery is low.

Contacts

In the App, allow access to your phone's contact list/ address book and add up to 8 favourite contacts into the call function of the watch.

Phone Page

Steps Page

Functions & Features

Movement

- The watch records and displays the number of steps you walk each day, the calories burned and the distance travelled. More detailed analysis and data records can be viewed in the App.

Sleep

- The watch records and displays the total number of hours of sleep, as well as how many hours were light sleep and deep sleep. More detailed analysis and data records can be viewed in the App. The watch must be worn during sleep in order to record sleep data.

Heart Rate

- The watch records and displays heart rate 24 hours throughout the day. Click on the heart rate interface to measure the current heart rate. More detailed analysis and data records can be viewed in the App.

Blood Pressure

- Click on the blood pressure interface to measure the current blood pressure value. More detailed analysis and data records can be viewed in the App

Blood Oxygen

- Click on the oxygen interface to measure the current blood oxygen value. More detailed analysis and data records can be viewed in the App.

Weather Information

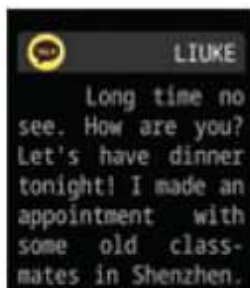

- The weather page shows the current weather as reflected on the connected phone. Location must be switched on in the App and in settings. Weather information cannot be updated if the watch is disconnected from the App on the phone for a long time.

Exercise

- 8 sports modes to choose from: walking, running, cycling, skipping, badminton, basketball, football, swimming. To commence an exercise session, tap on the selected mode, and the countdown to begin measurements will start. Measurements include duration of exercise, steps, calories burned, distance, and heart rate. To end the session, click on the key, and tap on the stop button. More detailed analysis and data records can be viewed in the App.

Messages

- The watch can display notifications & messages from the connected phone; in the App, you can select to switch notifications on/off.

Music Control

- When connected, the watch can play or pause and control the music player on the phone.

Camera Control

- When connected, the watch can be used as a remote control for the phone's camera. When the camera (shutter) in the App is opened, you can trigger the phone's camera by tapping on the watch's camera control page. Permission must be granted for camera and album/photos access.

Other Features

- Other functions of the watch include relax mode, stopwatch, alarm clock, countdown timer, torch, brightness adjustment, vibration alert switch, do not disturb mode, cinema mode, factory reset switch, shutdown switch.

Dial Options

- Press and hold the watch face page to access alternate dials, swipe to the right or left to switch dials, tap / click on selected dial to confirm. You can also choose to switch dials in the App.

Caution

- 1 do not use charging voltage greater than 5V or charging current greater than 2A adaptor, charging time of 2-3 hours
- 2 do not charge the watch when wet
- 3 this watch is an electronic monitoring product, not a medical device, and measurement data is for personal reference only

WARRANTY

This product is warranted to be free from defects in materials and workmanship for a period of 1 year from date of purchase. This warranty covers manufacturing and mechanical defects but excludes band and lens damage.
