

How to measure foot size:

1. Place your foot firmly on a piece of paper and transfer body weight to it. Draw the outline of your foot all the way around. Draw the second foot outline in the same way.
2. Using the outline, measure the distance between the farthest points - from the middle of the heel to the end of the first or second finger. From the obtained measurements of both feet, select the largest one.
3. Measure the width between the widest points of your foot.

The width 6 is considered as the most comfortable for home slippers. However our felt slippers have a standard width 5, as they will eventually enlarge in size.
