54[°] CELSIUS

54Celsius innovates the classic candle, one unique design at a time. We embrace the bold and the strange, the mythical, the cosmic, and the timeless - all to create striking pieces that glow with play and delight.

Using only top-quality ingredients, we ensure that every part of the burning process is clean and safe. That means recyclable or compostable packaging and intentional, traceable candle ingredients.

We develop products in-house, collaborate with visionary product designers, and source from multiple generations of candlemakers to bring the inventive to your home. From unboxing your candle to the flame's last flicker, every element of the 54Celsius experience is made to charm.
