SLING GUIDE

PART LIST

- A. Trigger Housing Group
- B. Stock
- C. Receiver
- D. Loaded Mag
- E. Leather Sling
- F. Long Screw
- G. Short Screw
- H. Screwdriver

1

Place trigger housing group (A) in stock (B). Housing group has tabs on both ends to hold it in place.

2

Attach the receiver (C) by sliding the stock (B) into the metal collar located at the bottom of the receiver. Combine parts together.

3

Insert long screw (F) into rear hole and short screw (G) into the forward facing hole. Tighten with included screwdriver (H).

4

Pull back on bolt to reveal clip loading area. Insert clip with dummy rounds facing the barrel. Push down until the bolt is clear and able to slide.

5

Attach sling. Arrange length as desired. Sling assembly instructions on reverse side.

6

Thread feed end through front swivel and through upper keeper.

7

Connect the upper hook into holes near the front swivel. Feed short strap through the rear swivel.

8

Pull short strap tight and connect beneath upper hook. Adjust length of sling as needed.
