 Refer to the Instructions For Use (IFU) on product packaging. Fresh Test, LLC products are regulated and labeled to meet Class II Medical Device standards. The glucose powder line should be reconstituted with 10oz of water. It is recommended that patients follow a site's existing Oral Glucose Tolerance Test (OGTT) protocol & current thresholds set by accredited organizations such as the American Diabetes Assoc., American College of Obstetricians and Gynecologists, American Assoc. for Clinical Chemistry, etc.

# Improving the patient experience with The Fresh Test™

## The Fresh Test™ diagnostic glucose beverages are...

- Validated** - The Fresh Test™ products are labeled for the detection of Gestational Diabetes Mellitus. Manufactured in accordance with Class 2 Medical Device Standards Title 21 CFR Part 820. FDA# 317544399. Regulation Code 862.1345.
- Equivalent** - As a diagnostic glucose beverage, Fresh Test, LLC ensures exact equivalency to predicate brands. ISO 17025 Certificates of Analysis are available. Upon request, please reference the Unique Device Identification (UDI) or Lot Number.
- More Palatable** - According to a Manufacturer's Survey, 355 out of 356 pregnant patients liked the taste of The Fresh Test™. This may be a good option for patients with tolerability concerns. The high-quality ingredients and formulation have been known to help ease nausea.
- Meets your patient's needs** - Every year, more and more patients are label reading and choosing additive-free options. This is great for the health of our country. The Fresh Test™ is made with organic ingredients that meets our patients' needs.
- Reimbursed** - Many laboratories & offices stock The Fresh Test™ exclusively or as an option for patients with known allergies. Does your site have CPT Code questions? Please refer to our Reimbursement Guide. Patients are also welcome to purchase product directly from our website and use their HSA/FSA for coverage.
