Badass Auger™

Assembly and Use Instructions

ASSEMBLY

- 1. Make sure all parts pictured are present.
- 2. Lay part "A" flat on the ground.
- Attach auger "B" to auger "A" with wing bolt. Tighten securely.
- 4. Slip tube "C" over auger "B" and tube "A". Tighten wing bolts.
- 5. Plug controller "D" to motor on part "A".
- Plug opposite end wire of controller "D" to battery pigtail plug "E".
- "IMPORTANT" Connect negative (Black) alligator clamp to any metal part on engine compartment.
- 8. Connect Red alligator clamp to the Positive battery post.

USE INSTRUCTIONS– READ CAREFULLY Read and obey all warning labels for the Badass Auger.

IMPORTANT: Make sure feeder being filled is level and legs are securely anchored to the ground. NEVER extend Badass Auger legs beyond 24 inches. NEVER place more than 40 lbs of weight on hopper. NEVER turn your back on feeder being filled.

- 1. If possible, load the Badass Auger from tailgate-level of your vehicle. SAVE YOUR BACK
- Place 40 lb bag of feed into the hopper. Using a knife, cut the bottom of the bag open, letting contents spill into the hopper OR, pour the contents of a bag directly into the hopper.
- 3. Holding the controller, press the FWD button to fill the feeder. When the hopper is empty, repeat steps 2 & 3.
- 4. ONLY AFTER HOPPER IS EMPTY press REV button on the controller to empty feed from auger tube.
- 5. Disassemble auger tube when transporting to avoid damage.
- When filling multiple feeders, disconnect plug "D" from plug "E". Leave plug "E" connected to battery, hanging out of vehicle hood, being careful wire is not damaged. Travel to next feeder and repeat step 1-6.

WARNING READ BEFORE OPERATING THIS EQUIPMENT:

Make sure hopper finger guard is in place and ALL fasteners are tightly secured.

Do NOT put fingers inside finger guard or near auger.

The feeder should be securely anchored to the ground to avoid tipping over.

Keep children at a safe distance.

Do NOT overload the hopper - 40 LBS max.

Make sure legs are secure on even ground.

Disconnect power cable before servicing any part of this equipment. Never put your hands in the hopper while in operation.

Read the instructions provided with this equipment, including the Safety Section.
