The Pro21
21 Reasons to Go Pro

ProLine®
The Professional Irrigation Controller

PL1600
4 to 24 Zones

The ProLine family also includes:

PL800 / 4 to 8 Zones

PL4800 / 12 to 48 Zones

No other controller offers all these features for this price.

1 ›› Prewired 6-foot pigtail (PL1600) included. Approximate savings of $6.00.

2 ›› Self-leveling mounting bracket (PL1600)

3 ›› Mounting screws and sheetrock anchors included Approximate savings of $4.00.

4 ›› Valve Locator - This feature will create a "chatter" for a selected valve as a convenient method of locating buried valves.

5 ›› Grow-In Program - allows the user to set up a new landscape grow-in watering program that will automatically expire after a set number of days that you select.

6 ›› Rain and freeze sensor bypass by station – enable or omit selected zones from sensor shutdown during rain or freeze conditions.

7 ›› Seasonal Adjust by month by program - allows the user to modify zone run times by program for each month to easily adjust watering for seasonal climate changes.

8 ›› Switch between English / Spanish with the touch of a button.

9 ›› Add a rain or rain/freeze sensor in minutes. No wiring required.

10 ›› Converts to 48 station two-wire system using SLM48DM module.

11 ›› Omit Calendar Dates (in addition to time and days of the week).

12 ›› Station test for a minimum of 10 seconds when 1-2 minutes is too long

13 ›› Rapid advance programming station run time option. Allows the user to quickly advance through stations while programming station run times.

14 ›› Only basic controller that can be upgraded to web-based remote access (PL1600, PL4800).

15 ›› Automatic daylight savings time adjustment.

16 ›› Changeable fused transformer which protects from electrical surges and lighting. #1 cause of controller electrical failure.

17 ›› Standardized controller panel for 4 to 48 zones conventional wired or two-wired allowing for interchangeability between platforms.

18 ›› Upgrade to "Smart" within minutes by a simple panel change out.

19 ›› 2-year lightning warranty.

20 ›› Add a wind sensor in minutes and program wind bypass by station – enable or omit selected zones from sensor shutdown during windy conditions.

21 ›› Connect your ProLine controller to the internet in minutes with an SL-WIFI or SL-AIRCARD Upgrade.
