

SLW5

WEATHER SENSOR

ET “Every Time”

Delivers smart evapotranspiration watering schedules straight to your SmartLine® controller.

Not an Afterthought

Water conservation has always been our primary focus. The SmartLine® controller integrates perfectly with the SLW5 and SLW1. No additional box to mount next to the controller.

- Real-time weather data recording and processing enables ET-based water scheduling to occur
- Weather data is used to create powerful reporting when connected to the SmartLink™ Network
- Adjustable Rain Sensor - 1/8, 1/4, 1/2, and 3/4 inch
- Prevents watering during freezing weather - below 37°F/3°C
- Compatible with the SmartLine® controller family
- SLW5 900mhz Range - 1,500ft Line of Sight
- SLW1 Includes - 35ft of cable
- Wireless Version - SLW5
- Wired Version - SLW1

Once the SLW5 is connected to SmartLine® all of the “Smart” features become available, saving you a significant amount of water.

| Model | Description |
|-------|---|
| SLW5 | Wireless Weather Sensor for SmartLine Controllers |
| SLW1 | Wired Weather Sensor for SmartLine Controllers |
