

1 >>> MODULAR

- 4-zone base model expandable to 8 zones using slide-in SLM2 2-zone modules

2 >>> MANUAL TEST SETTINGS IN SECONDS

- Complete a walk-thru in a fraction of the normal time by running a manual test from 10 sec. - 10 min. in 10 sec. increments

3 >>> OPTIONAL WEATHER BASED WATERING

- Operate in standard mode or switch to Auto-Adjust by adding a SLW On-Site Weather Station for weather-based watering.

4 >>> REAL TIME CLOCK/CALENDAR & NON-VOLATILE PROGRAM MEMORY

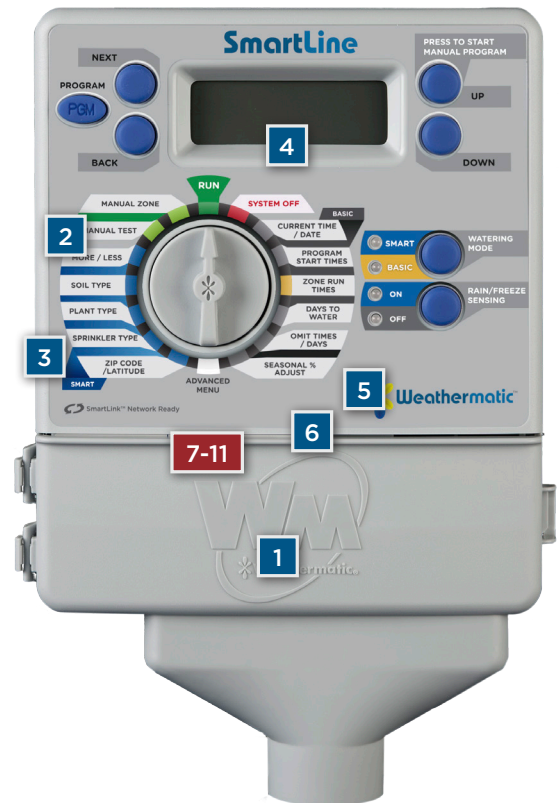

- NO BATTERY REQUIRED! On-board memory chip retains time, date, and program information even during a power outage

5 >>> OMIT TIMES/DAYS/DATES

- Automatically comply with local water restrictions; eliminate irrigated water lost to evaporation in the heat of the day; stop irrigation on lawn maintenance days; never water on the date of an annual event (ex: July 4th)

6 >>> SEASONAL % ADJUST BY MONTH

- A monthly watering budget % can be set up by program to automatically adjust zone run times for seasonal changes

Model	Description
SL800	Indoor only, 4-zone base model, expandable to 8 zones
SLM12	2-zone module for SL800

ADVANCED MENU

7 >>> RUNOFF ELIMINATOR

- Eliminate runoff by setting the maximum allowable run time and minimum soak time by program

8 >>> MASTER VALVE/PUMP SETTINGS

- Achieve hydraulic control with settings for zone-to-zone delays, master valve timing, and master valve On/Off by zone

9 >>> STORED PROGRAMS

- Easily save and retrieve a default program in the event a erroneous program changes

10 >>> ON-BOARD MULTI-METER

- Displays the electrical current reading of each zone for quick troubleshooting and a proactive approach to maintenance

11 >>> BUILT-IN VALVE LOCATOR

- Locate hidden valves by simply listening for the audible chatter of the solenoid created by a unique electrical frequency (patent pending)
