

# Xerigation® Control Zone Kits

## Complete Zone Coverage

Xerigation® Control Zone Kits (XCZ) provides a complete and easy to install package that will properly deliver water to the drip irrigation system. Rain Bird's XCZ's contain all three essential components to ensure the drip install operates at its optimal performance for years to come. The control zone kits contain three major components: the valve, filter, and pressure regulator. Each component performs an important function on supplying the proper water conditions for the drip irrigation system. Rain Bird XCZ pre-packages these components making it easy for you to select, order, and install.

## Xerigation® Commercial and Residential Control Zone Kits

### Valve

- Decades of proven performance for peace of mind
- Commercial or Residential
- Low, medium, and high flow rates
- Valves for reclaimed water
- Valves with Anti-Siphon
- Low flow without weeping

### Filter

- Prevents sediments and impurities from entering the drip system
- Extends the life of the drip system for years to come
- Basket filters with quick check indicators
- Easy to clean commercial disk filters for harsh water

### Pressure Regulator

- Pressure Regulation ensures constant outlet pressure for proper operation
- Reduces the chance of tube and fitting blow outs
- Pressure regulator built into the filter to minimize size (Look for the white dot)
- Stand alone options

**Savings • Convenience • Reliability**
