

MICRO SPRAYS

Apply water accurately for small-area coverage.

Solo-Drip

The Solo-Drip Micro Spray provides eight streams of close-in coverage that apply water exactly where it's needed. Featuring fingertip cap control for flow and throw adjustment, Solo-Drip provides efficient, reliable close-in and adjustable coverage.

Halo-Spray

For a full-circle umbrella of water with a larger diameter than the Solo-Spray, Hunter offers the Halo-Spray. It's completely adjustable, so it can be customized per application and landscape type. For a 'blanket of water effect,' multiple units can easily be combined and appropriately configured.

Trio-Spray

When fixed pattern micro sprays are required with poly-flex risers, Hunter offers the Trio Micro Spray family. The Trio-Spray is available in full-circle, half-circle and 90-degree options, and is ideal for a controlled environment that's slightly larger, yet still requires a specific radius and pattern.

Solo-Drip

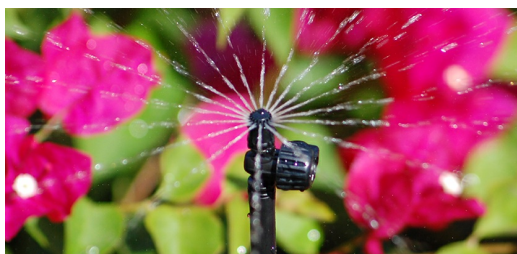

- Eight streams of water for thorough coverage
- Adjustable cap for flow and radius adjustment

Halo-Spray

- Adjustable umbrella of water
- Adjustable cap for flow and radius adjustment

Trio-Spray

- Full-, half-, and quarter-circle configurations
- Adjustable cap for flow and radius adjustment

Uses: Accurate Area Watering

SD-T

Height: 1.0"
Length: 0.6"
Width: 0.8"
Radius: 360°

SD-B

Height: 1.0"
Length: 0.6"
Width: 0.8"
Radius: 360°

SD-B-STK

Height: 6.0"
Length: 0.6"
Width: 1.7"
Radius: 360°

HS-T

Height: 1.0"
Length: 0.6"
Width: 0.8"
Radius: 360°

HS-B-STK

Height: 6.0"
Length: 0.6"
Width: 1.7"
Radius: 360°

HS-B

Height: 1.0"
Length: 0.6"
Width: 0.8"
Radius: 360°

TS-F

Height: 1.5"
Length: 0.6"
Width: 0.9"
Radius: 360°

TS-H

Height: 1.5"
Length: 0.6"
Width: 0.9"
Radius: 180°

Model	Description	TS-Q
