OH CHAIR

This durable and ultra-comfortable chair has a nice give to it, which means when you lean back in your seat, the chair will move with you. Chic inside the house or outside on your patio or porch, the chair's polypropylene can withstand the rain and has an ultraviolet stabilizer built into it which means it will not become faded in the sunlight. Its nylon feet will prevent your floors from getting damaged. Comes as a set of two chairs.

- The Oh chair is a comfortable, attractive chair suitable for indoor and outdoor use
- Recipient of the 1999 IDEA Award and included in the MoMA SF, Museum of Modern Art in San Francisco
- Karim designed the Oh chair because he wanted to create a plastic chair that was comfortable, attractive and durable, unlike the typical plastic chairs seen on patios
- The Oh chair easily stacks, thanks to its strategically placed holes; comes as a set of two
