Rapid Covid Test Kit

The BD Veritor™ Plus system provides objective, lab-quality immunoassay test results for healthcare providers and laboratorians in physician offices, clinics, and hospitals—within minutes. The system streamlines the point-of-care (POC) diagnostic workflow and allows providers to quickly review patient results and determine the appropriate treatment in a single consultation. It can also help detect infectious diseases such as influenza A and B, respiratory syncytial virus (RSV) and group A strep while the patient is still on site, which may facilitate decision making for earlier intervention.

BD Veritor System for Rapid Detection of SARS-CoV-2

Product Code: 256089

Simple sample collection

Rapid, reliable results

Convenient portability

Reporting options available

The BD Veritor™ System for Rapid Detection of SARS-CoV-2 is a chromatographic immunoassay for the direct and qualitative detection of SARS-CoV-2 antigens in nasal swabs from patients with signs and symptoms who are suspected of COVID-19.

PATIENT CARE

Isopropyl 70% Rubbing Alcohol

70% USP grade Isopropyl alcohol is formulated with high purity isopropyl alcohol and purified water to achieve a higher antimicrobial activity. This careful dilution process slows evaporation and increases the contact time to achieve optimal effectiveness.

Product description:

- Topical antiseptic solution for minor cuts, scrapes and burns
- Antiseptic cleanser
- Kills harmful bacteria/germs

Alcohol Swab

- Made using USP-grade 70% isopropyl alcohol
- Ideal for skin cleansing for injections and IV attachments
- For use in first aid kits and rooms
- Individually packaged in compact, single-use foil sachets
