Remove contact lenses, if present and easy to do. Continue

rinsing.

If eye irritation persists: Get medical advice/attention.

First-aid measures after ingestion: Do not induce vomiting without medical advice. Never give

anything by mouth to an unconscious person. Get medical

advice/attention if you feel unwell.

# 4.2 Most important symptoms and effects, both acute and delayed

Symptoms/injuries after inhalation: May cause irritation to the respiratory tract. May cause

drowsiness or dizziness.

Symptoms/injuries after skin contact: May cause skin irritation. Repeated exposure may cause skin

dryness or cracking.

Symptoms/injuries after eye contact: Causes serious eye irritation. Symptoms may include discomfort

or pain, excess blinking and tear production, with marked

redness and swelling of the conjunctiva.

Symptoms/injuries after ingestion: May be harmful if swallowed. May cause gastrointestinal

irritation, nausea, vomiting and diarrhea

#### 4.3 Indication of any immediate medical attention and special treatment needed

Symptoms may be delayed. In case of accident or if you feel unwell, seek medical advice immediately (show the label where possible)
