ABENA Slip Premium

New light construction

New light construction

ABENA Slip Premium is a range of environmentally friendly incontinence products. Our range features a light construction with an optimal fit and discreetness. Every detail is tailored to user-needs and to ensure high-quality care for users and their caregivers.

More discreet - same absorption capacity

Through state-of-the-art-technology, we have optimized the products without compromising on absorption capacity and high quality. The benefits for the users are a more discreet product with an increased comfort.

High performance core for optimum leakage protection

This combined with Top-Dry Technology ensures a dry surface even after multiple voids, maintaining skin integrity.

-
- New shape and light construction for optimal comfort, fit and discreetness.
 - Double elastics for ultimate leakage protection due to the curved leg elastics and extra elastics at the leg cut.
 - Dual wrapped core for optimal leakage protection and less risk of clumping.
 - New folding features an easier and more hygienic unboxing.

New wrapping
