2. Pre-moulded pipe knock outs for ease of installation
3. Integrated lid locking mechanism
4. Advanced moulded lid hinges

The UK's No.1 Supplier of Meter Boxes | www.meterboxes.co.uk

Product Details

The universal MK2 Unibox has been developed to provide greater flexibility for J42 regulators and the latest smart and pre-payment meters.

Installation of inlet and outlet positions is easily achieved with pre-moulded pipe knockouts in the body of the unit making installation quick and easy for installers.

Incorporating a new integrated lid locking mechanism with advanced moulded lid hinges enables the MK2 Unibox to offer greater security, access and durability for domestic gas meter housing, while still complying with BS8499:2017 specifications.
