

What you have:

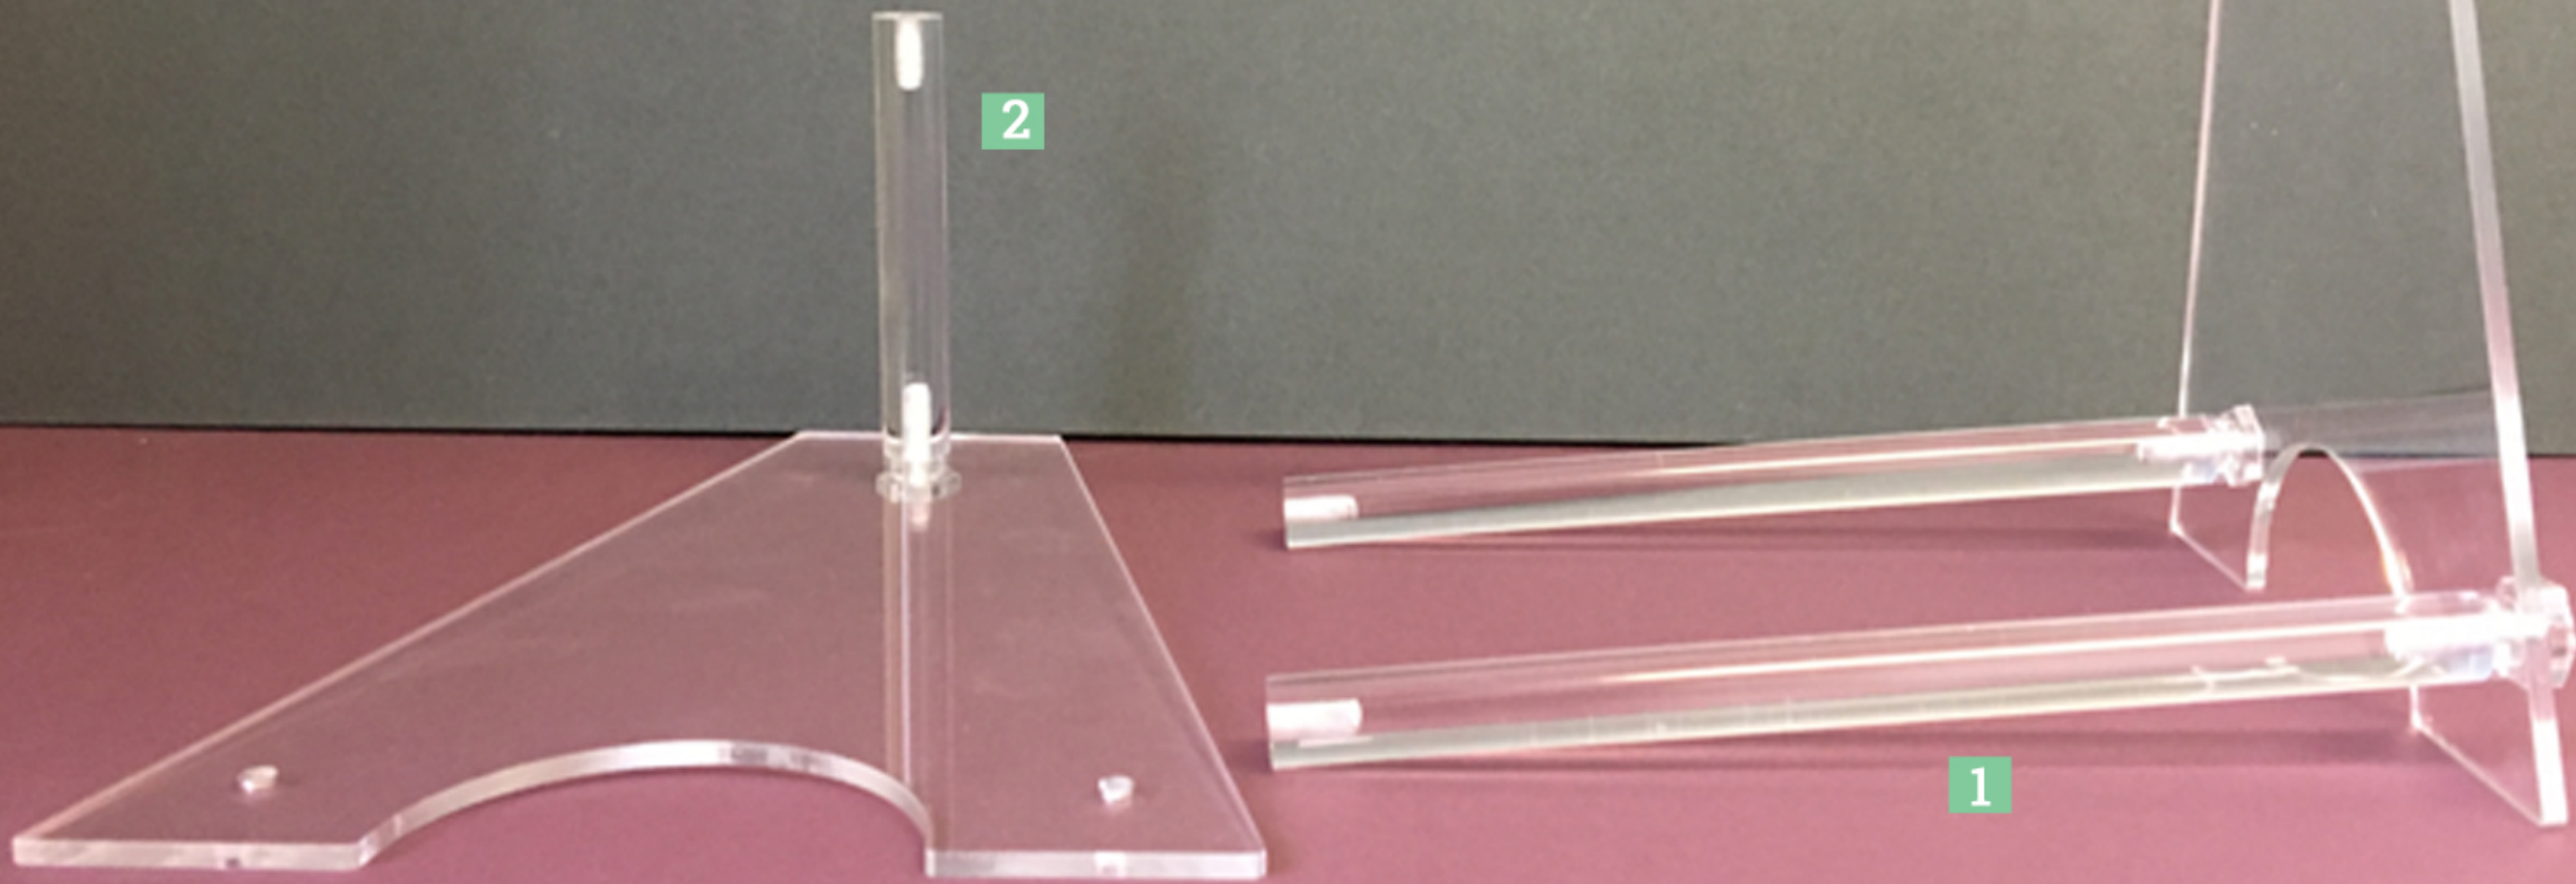

- 1. 2x end stands
- 2. 1x wheel
- 3. 12x spokes with stoppers
- 4. 2x short spokes
- 5. 2x long spokes
- 6. 6x spoke stoppers
- 7. 6x screws
- 8. 7x dowel screws

What you will need:

- 1x Philips head screwdriver
- Lots of lovely Splendette bangles

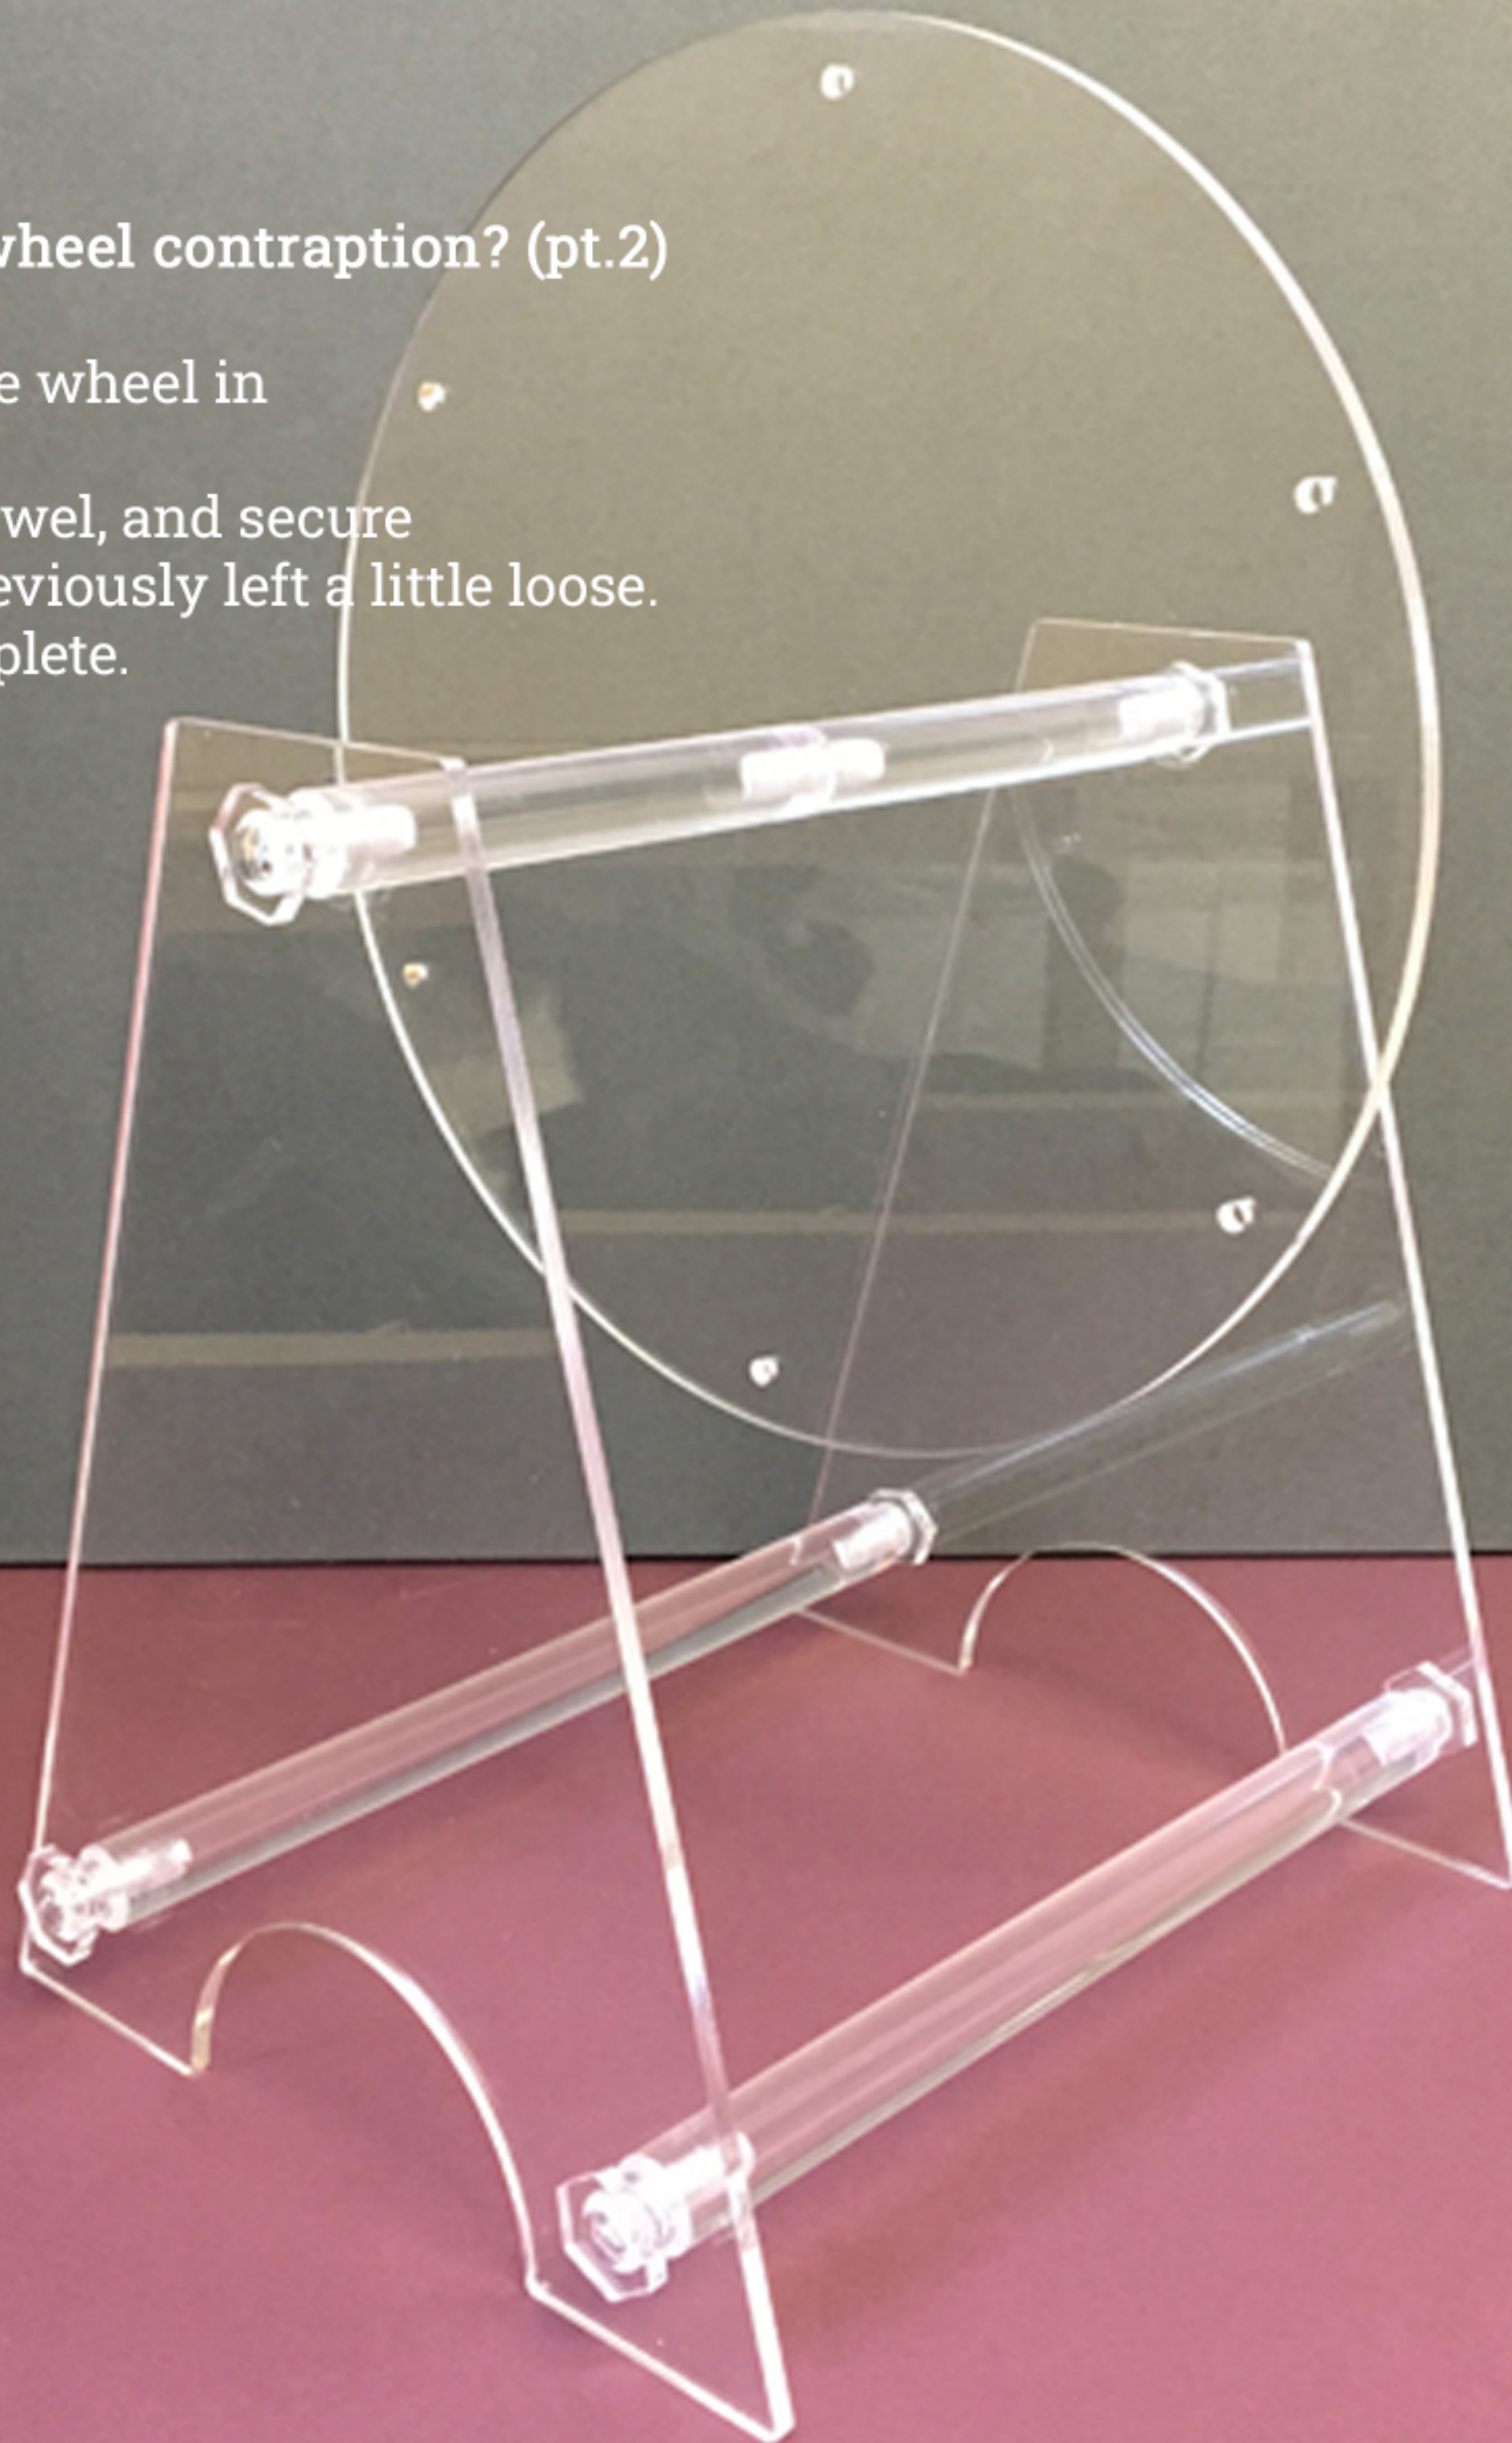

But how do I make this Ferris wheel contraption? (pt.1)

1. Secure the two long spokes to the base of one end stand using a screw and stopper for each spoke.
2. Repeat for the two short spokes at the top of both the end stands but keep one loose so you can fix the wheel.
3. Wind one dowel screw into one of the short spokes.

But how do I make this Ferris wheel contraption? (pt.2)

4. Stand the frame up and slip the wheel in between the two top spokes.
5. Line up the spokes with the dowel, and secure by screwing in the spoke you previously left a little loose. Et voila! Your base frame is complete.

But how do I make this Ferris wheel contraption? (pt.3)

6. Now for the wheel. Twist the dowel screws into half the spokes with stoppers.
7. Put one of the dowelled spokes through a hole in the wheel and pair it with an un-dowelled spoke.
8. Twist, twist, twist until they are tight and not wobbling anymore.
9. Repeat for all six pairs.
10. Look at that! What a perfect Ferris Wheel!
Now it is time to fill it with your Splendette beauties!
