GENERAL SUMMARY

The technical designer serves as an integral part of the Creative team. They must be extremely detail-oriented, responsible, a team player, and comfortable using a wide range of graphic programs. Their role is to assist and support the creative team by producing clear and detailed technical drawings, as well as prototyping and assisting in the design of new collections.

Duties & Responsibilities:

Design

- Create accurate 3D renderings using RHINO.
- Create all precise tech packs for new product development.
- Spec all jewelry items, leather goods & accessories.
- Collaborate with Head Designer to create accurate visual representations of new ideas & developments.
- Research new ideas and projects.
- Hand sketching & color rendering as necessary.

Technical

- Point person for all technical aspects of the Creative team.
- Create accurate and detailed technical drawings to spec, in 2D, and/or 3D.
- Comfortable using Rhino, Illustrator, Photoshop, InDesign and/or other programs as required.
- Review & cross check all new development samples for approval.
- Review bulk production arrivals and confirm compliance with master approved samples.
- Takes ownership of all communication with vendor, effectively relaying corrections, comments and other issues as they arise.
- Ensures size and fit consistency across all styles according to Miansai Jewelry Standards.
- Responsible for all prototyping machines, producing models for new ideas/development.
- Support sales team by providing technical information to relay to customers as well as pieces for displays/merchandising.
- Clearly organize & maintain all technical drawings in dropbox. Responsible for making sure the vendor has most updated version.
